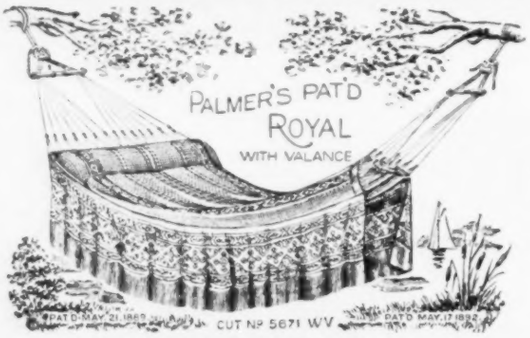
PALMER'S Patented Arawana and Perfection Hammocks with Linen Finish.



Largest variety of Colors and Styles and Sizes.

WIDE VALANCE.

PALMER'S Patented HAMMOCKS.

Send for New Catalogue for 1899. Infringers are being prosecuted.

I. E. PALMER, Sole Manufacturer, Middletown, Conn., U. S. A.

NEW YORK OFFICE, 62 WHITE STREET.

Also Manufacturer of

Palmer's Crinoline Dress Linings,
Canopies,
Mosquito Nettings,
Hammock Accessories,
Window Screen Cloth,
Etc.

The above figure represents a reclining position in an Adjustable Hammock Support as used indoor. This support may be extended or contracted. The Seat may be lowered or raised by the adjustment of the side cords where attached to the seat.

This Support is adapted to Lawn, Veranda and *Indoor* use, and like the Trapeze Suspension, is adjustable to different sizes of Hammocks within its scope (from 6 ft. 3 in. to 11 ft.), and to giving different degrees of dip and height from floor.

For indoor summer or winter use, it will appeal to all who are inclined to ease and comfort as it can be taken from a closet, set up, and Hammock hung ready for use in one minute.

Excavating

For Cellars, Foundations, Piers, etc., if good implements are used, is accomplished in much less time and with greater economy to the contractor than when inferior goods are used.

THE KILBOURNE & JACOBS MFG. CO of Columbus, Ohio, U. S. A., recognizing the fact that no product requiring a constant "bolstering" up by a continued repetition of its alleged merits will fill the requirements, have built up the most extensive establishment of its kind in the world for the production of Drag and Wheel Scrapers, Barrows, etc., Catalogues of which are free to inquirers. Their goods are on sale at all leading Jobbers, both in the Eastern and Western Hemispheres.

"Invaluable to all Dealers"

CARIBOU, Me.

David Williams Company:

I bought a copy of THE AMERICAN HARDWARE STORE from you, and I am glad to tell you that the book is, in my estimation, invaluable to all dealers.

It is exactly what I wanted, and by its help I have begun a radical change in our retail department, and am having built shelving and cases that will be of incalculable benefit, besides being very handsome in appearance.

W. C. SPAULDING.

450 Pages. 500 Illustrations.

Iver Johnson Cycles, $40 to $75.00.

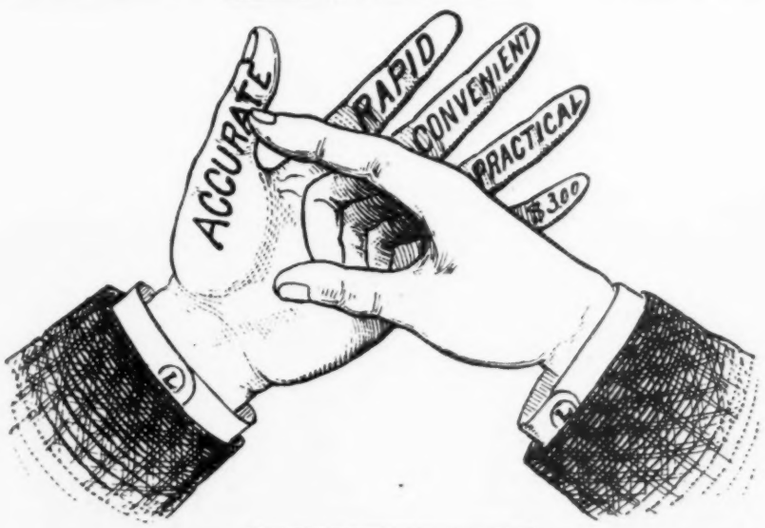
For Just 1c.

you can secure our new cycle catalogue, which describes the various models, shows features of construction and explains the superiority of our cycles. If you buy a bicycle, buy a good one. We make that kind. Buy a postal and write us for this book. We'll be glad to send it. If you're a dealer we'll be glad to talk agency also.

BRANCHES:
New York, 99 Chambers St.
Boston, 408 Washington St
Worcester, 304 Main St.

IVER JOHNSON'S ARMS AND CYCLE WORKS,
FITCHBURG, MASS.

LADD'S DISCOUNT BOOK.



For Example, we desire to find the net of $73.00 at discount 65, 20, 7½, 5 and 2½ per cent. By the old way we take our pencil, and, after a deal of figuring, conclude (if we haven't made an error) that the result should be $17.51, but we are not sure of it till we prove it. By the new way (the use of Ladd's Discount Book), we put our finger right on it in a moment, and know that the result is correct.

The book contains over 100,000 computations, and is indispensable where percentages are employed. Price, per mail, $3.00. Double Indexed Edition, $4.00.

OILLESS BEARINGS.

A strong letter of commendation from a firm whose reputation is "world wide" as the manufacturers of the celebrated "PEARLINE."

NEW YORK, Nov. 26, 1897.

NORTH AMERICAN METALINE CO., 43 Third St., Long Island City, N. Y.

Gentlemen: Your favor of 20th inst. received; in reply are pleased to say that your Metalined Bushings have given us entire satisfaction. We first applied them in 1886 or '87 under very trying conditions, put them in fast running loose pulleys with high tension belt, and they gave perfect satisfaction. Since then, we have extended their use throughout our works, and they have given satisfaction wherever we have placed them. Very truly yours,

JAS. PYLE & SONS.

New "Cold" Process of Galvanizing.

In use for more than two years with best and absolutely satisfactory results. Articles that cannot be galvanized by any other process, such as screws, nuts, cutting instruments, tools of every description, springs, locks, artistic metal articles, can be galvanized in a superior manner by this process. The multitude of articles that can be galvanized is without limit. Uniformly smooth surface is preserved, thickness of coating can be regulated, saving of spelter about 80%, besides many other advantages. *We grant licenses for territory, also shop rights on royalty basis.*

San Francisco Sept. 29/98.

Hoyt Metal Co.,
St. Louis, Mo.
Gentlemen:-

Reporting on the merits of the Nickelehe Babbitt Metal, we have used a large quantity of it with the most satisfactory results. It has given better satisfaction than any other babbitt metal we have used, including all the standard brands, particularly for electric and marine engine bearings where it is subject to the severest duty.

We will be pleased to give you or others the names of steamers using it, also the names of their engineers and owners to whom any one can write. Without exception we believe, that all will speak favorably of it and from our own experience with it and other metals we decidely recommend it.

Very truly,
FULTON ENGINEERING & SHIP BUILDING WORKS.

Dict. by J. E. Sr. *James Speirs Pres*

YOU WILL SEND US AN ORDER.

HOYT METAL CO.

Nickelene, although very hard, is so tough that it can be hammered to a knife edge.

Nickelene is being used by many in place of Phosphor Bronze.

Nickelene can be melted in an iron ladle or kettle, and at a little higher temperature than that necessary for melting Babbitt Metal, runs freely and makes a good casting.

NICKELENE IS THE BEST BABBITT METAL IN THE WORLD.

THE BERLIN IRON BRIDGE CO.,

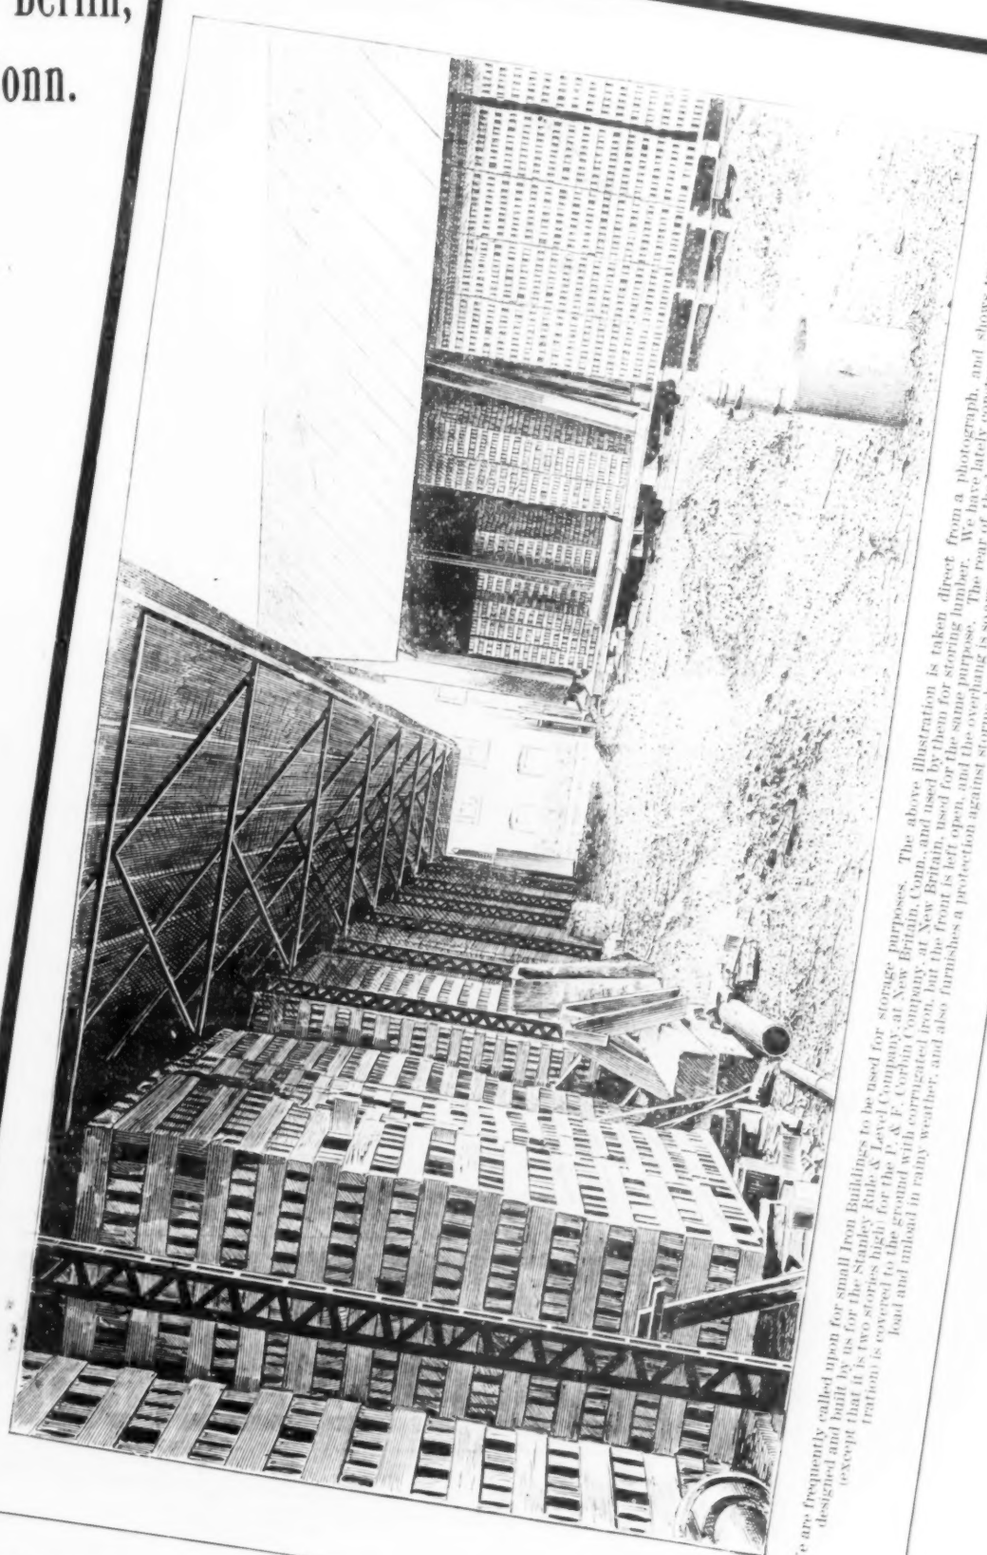
Engineers, Architects and Builders

of Steel Structures of All Kinds.

Main Office and Works:

East Berlin,

Conn.



We are frequently called upon for small Iron Buildings to be used for storage purposes. The above illustration is taken direct from a photograph, and shows two such buildings designed and built by us for the Stanley Rule & Level Company, at New Britain, Conn., and used by them for storing lumber. We have lately constructed a similar building (except that it is two stories high) for the P. & F. Corbin Company, at New Britain, Conn., and used for the same purpose. The rear of the building (not shown in the illustration) is covered to the ground with corrugated iron, but the front is left open, and the overhang is so arranged that teams can drive under and load and unload in rainy weather, and also furnishes a protection against storms bearing on the material stored in the shed.

ATLAS METAL.

TENSILE 50,000 POUNDS.

Atlas Metal is defined by Prof. Charles James, the well-known Steel Expert, as "A New Commercial Product, standing between Iron and Steel, and uniting in itself the best characteristics of both."

ITS CHIEF POINTS ARE

GREAT STRENGTH. GREAT WEAR. UNIFORMITY. EASILY MACHINED.

HOMOGENEOUS.—Atlas Metal is not surface treated—the castings can be made of any weight, size or thickness, and the metal will be of uniform structure and entirely homogeneous throughout.

CORRESPONDENCE SOLICITED.

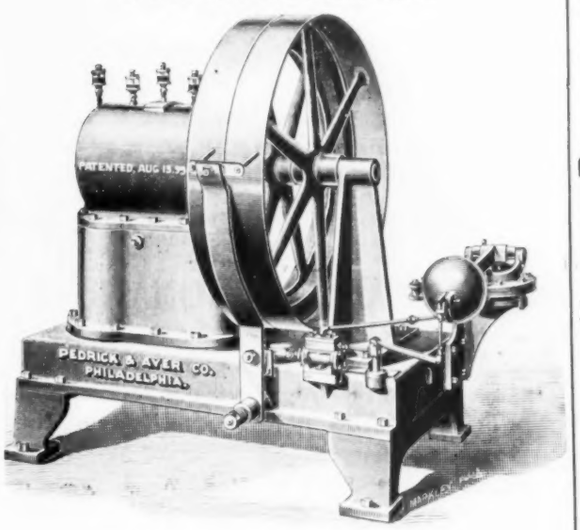
Automatic Compound Belt Air Compressors.

PATENTED AUGUST 13th, 1895.



Straight Lift Hoist. *Built in two sizes, Nos. 1 and 2.*

No.	Size of Cylinders in inches.	Revolutions per Minute.	Cubic Feet of Free Air	Horse Power required.	Size of Pulleys in inches.	Shipping Weight of Compressor	Floor Space in inches	Telegraphic Symbol
1	11x 6 6x 6	100-160	32- 50	3-5½	40x5	2875 lbs.	60x40	Parian
2	15x10 8x10	90-120	80-130	9-15	60x6	5570 lbs.	76x60	Parish

Horizontal Hoist.
Pat. Sept. 4th, 1894.

Horizontal Air Lift for low ceilings; for general lifting; quick in action and under perfect control of operator. Straight Air Lift for foundry purposes; when equipped with retaining and releasing valve will hold the load, whether heavy or light, in the desired position, as in case of lifting a ladle of molten iron and pouring it, or raising a flask to knock out the sand. It can neither ascend nor descend as long as connected to air supply.

Air Hose Couplings are designed to do away with long lines of hose. By having suspended along the air line a number of hose equipped with this device, connections can instantly be made or disconnected, allowing one hoist to serve in different places. Each size made in duplicate. Containing a shut-off valve.

Air Hose Coupling
For ½ inch, ¾ inch and 1 inch Hose.

These Compressors will compress more air at less cost than any other make, requiring no attention other than oiling; entirely automatic in action, stopping and starting as air is required. Specially adapted for foundry use. Can be run in series; if so, no stoppage possible.

Westinghouse Compound Engine Generating Set.

Speed Regulation

It is important that an engine intended for electric lighting service be especially well governed. Our engine governor is of the "inertia" type, and is capable of being adjusted to maintain a speed regulation of within one per cent. from normal. It is a well-known fact that the life of incandescent lamps is reduced 50 per cent. by a variation in the speed of the dynamo exceeding 2½ per cent. Speed regulation, therefore, is an important factor in electric lighting.

Muddy Water.

When water is turned into steam within a boiler, what happens if there is mud in this water? The solid particles are certainly not evaporated—what becomes of them? Some are worked out through the blow-off, the rest settle in different parts of the boiler. The lime, magnesia and other chemical impurities act as a cement, binding together the insoluble matter, and scale is formed—hard or soft, according to the amount of baking. The difficulty of removing scale, the cost of doing it, and the losses occasioned through the heat given out by the coal being unable to quickly and readily pass through this insulating stuff are well known.

Why not stop the mud and other impurities from entering the boilers? Why not provide a receptacle in which they can settle and lodge and that will be easier to clean than a boiler? Why not arrange your plant so that you will have to use only about five-sixths of this impure water, instead of the full six-sixths required to be evaporated?

"Not every heater will enable you to obtain the purification to which we have referred—a COCHRANE FEED WATER HEATER AND PURIFIER will. Beyond question, one of these heaters will give you the full purification which can be obtained at the temperature of exhaust steam, and no other heaters are so easy to clean."

Air Compressors Catalogue No. 32.
Not our name always, but that of others to show what can be done.

INGERSOLL-SERGEANT
Class "A."

The Passaic Rolling Mill, Paterson, N. J., with a monthly output of 5,000 tons of structural steel, use 40 cylinder hoists, 12 riveters, 5 drills and reamers, 2 chipping tools and other apparatus, all operated by compressed air from an Ingersoll-Sergeant Class "A" Straight Line Piston Inlet Air Compressor. The plan of distribution of air power necessitated careful engineering and close investigation of the merits of air compressors to secure good results. It is the high-class machine, built rigidly, embodying every detail of scientific construction, that wins in a test like this.

Catalogue No. 41, ROCK DRILLS Mines, Quarries, Tunnels Contract Work, Good Roads.
Catalogue No. 72, POHLE AIR LIFT PUMP Water Works, Railroads, Factories, Irrigation, Etc.
The Ingersoll-Sergeant Drill Co., Havemeyer Building, New York.

Don't be misled by the manufacturers of steam and electric pumps who try to talk you into buying one of their poorly constructed machines because it is low in price. "The best is the cheapest." Worthington Pumps have always been conceded the best; hence, even if their first cost appears high, they will prove the safest investment in the end.

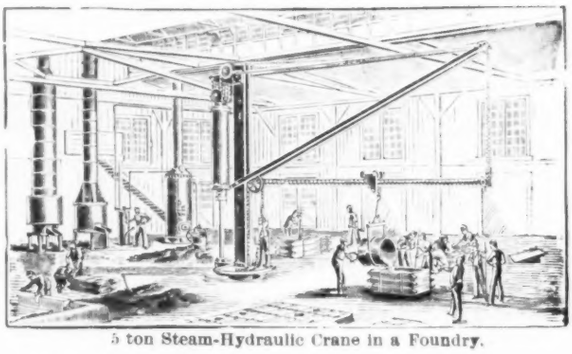
EXIT RIDGWAY CRANE.

Now that times are good and you are getting elegant prices and making money hand over fist, you have no use for a labor saver like the Ridgway Crane.

The Ridgway Crane is a hard times machine, to make money for people when they have to figure down to the inch bone. You get such good prices now you don't need to save anything in handling your stuff, and so the Ridgway Crane will have to retire and wait until something picks the Trust bubbles and we have another panic and hard times, and its services be again in demand.

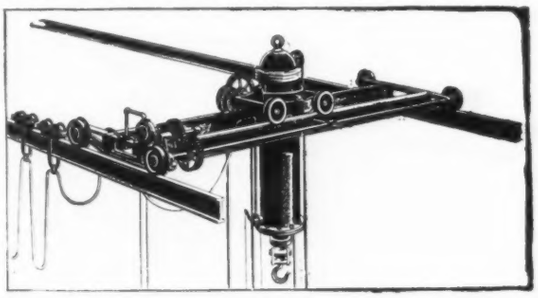
"The Ridgway Crane was certainly a dandy machine in its day, wasn't it? Don't you remember, all we had to do was to set her up, pipe her to the boiler, and the way she would handle stuff was a caution! Don't know how we would have gotten along in the days when stuff used to be a cent a pound if it had not been for the Ridgway Crane. If a fellow had a Ridgway Crane in the shop he could make a little money even at hard pan prices. But poor Ridgway, the good times have knocked him out. Wonder what has become of him?"



5 ton Steam-Hydraulic Crane in a Foundry.

Hydraulic Air Hoists.

Just what you want for safety and efficiency. A little oil in the piston rod makes the Air Hoist as steady as an hydraulic. Costs more than other hoists to buy, because costs more to make, but is worth the difference many times over. Please order well ahead of your requirements if you conclude to get these magnificent hoists.



"Please Take the Elevator."

Everybody who knows them uses them for short lifts. Cheap and good.

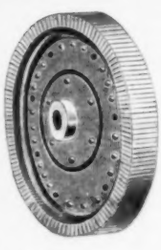
Compress Wheel Talks.



No. 2.

THE only infallible criterion by which a Polishing Wheel should be judged is the measure in which it combines abrasive powers with lasting qualities, or, say its "cut" and "stay." We distinctly claim for our Compress Polishing Wheels unequaled capabilities in both of these features, while its peculiar construction absolutely guarantees its safety when run at the highest possible speeds. If there be anything which the Compress Wheel cuts exceptionally well, it is the annual outlay for polishing wheels. Our catalogue is brief but convincing. Shall we mail it to you?

COMPRESS WHEEL CO.,

New London, Conn.

European Agents, SELIG SONNENTHAL & CO.,
85 Queen Victoria St., LONDON.

Send for Booklet.

The Chuck that Lasts.

The usefulness of ordinary drill chucks is ended when the jaws begin to wear, because the grip of the jaws is all that keeps the drill from slipping. It's different with the Pratt Positive Drive Drill Chuck In this chuck a positive driver holds the flat end of the drill, and makes slipping impossible. Even if the chuck jaws are not tight, the tool can't slip The equalizing driver permits the jaws to align the drill perfectly in the chuck, and hold it true. You pay as much for ordinary chucks.

PRATT CHUCK CO., Frankfort, New York, U. S. A.

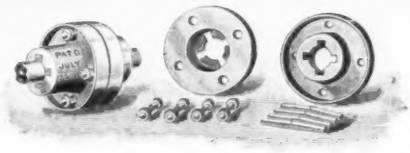
Nicholson Patent Flanged Face Compression Shaft Coupling.

Is easily and quickly attached to or detached from shafting.
Will adjust to a somewhat larger or smaller than standard size shaft.
Has double the grip of other compression couplings and is the most perfect fitting coupling made.



Saves cost of key-seating shafts, fitting keys, and refacing couplings after being keyed on shaft.
Holds the shafts in accurate alignment with each other, the jaws being full length of coupling and extending over both shafts.
Has a very powerful grip equally exerted from FOUR sides (not on two sides as with the majority of couplings).

Price-List and Discount on Application.

Our New **SUPPLY CATALOGUE** *(Desk or Pocket Size) will be mailed free to any one on application. Write to any one of the addresses given below.*

BICKFORD DRILL & TOOL CO.,

10 Lawrence Street, Cincinnati, Ohio, U. S. A.

WHAT IS ECONOMY?

Some people make a man hunt for an oil can ten minutes rather than have a spare one in the shop. They do not spend money for unnecessary things, but when pay day comes they pay very dearly for ***hunting*** for oil cans.

True economy reduces the pay roll to a productive value and ***hunting*** becomes a ***tangible asset*** in the shape of new tools. One of the most progressive manufacturing companies ordered twelve Automatic Wire Straightening and Cutting Machines this week. They know what they will save. How is it with you?

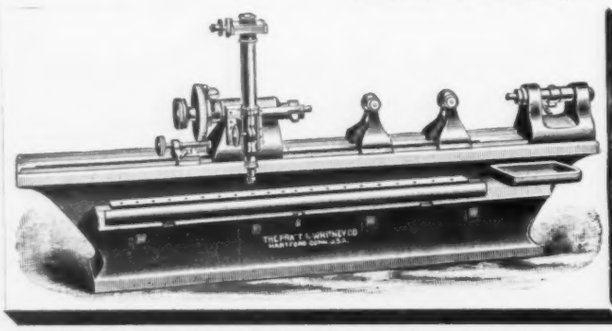
STANDARD GAUGES.

If your BOLT IRON is not uniform in diameter when received in one lot or at different times and causes annoyance in adjusting your heading or threading dies, and expense, when too large, for more weight than is required, you can protect yourself by buying and using to test iron, as delivered, BAR IRON LIMIT GAUGES, made by the undersigned. If your PIPE and FITTINGS WON'T CONNECT WITHOUT RETHREADING you can use PIPE THREAD GAUGES, BRIGGS' STANDARD, to test them on receipt.

The manufacturers have the gauges and will use them rather than have their goods rejected because not made to the gauges when so ordered.



STANDARD MEASURING MACHINES.

12 to 48 inch capacity, including Microscope and Graduated Bar for insuring *absolute standard uniformity*. The new Decimal Gauge, the American Railway Master Mechanic's Association Standard, adopted by all railroads in the United States for gauging wire and sheet metal. Cylindrical Size, Forged Caliper, U. S. Standard Screw Thread and Special Gauges for every variety of interchangeable production.

Hand, Chucking, Rose Shell, Morse Standard Taper, Standard Taper Pin, Locomotive Taper and Special Reamers; Taps and Dies.

American Machinery Import office, Zurich.

FRICTION

is a desirable thing to relieve, be it between individuals, families or communities. But the man who can best relieve the constant friction in machinery will, without doubt, be heartily welcomed by all power users. Of the forty to eighty per cent. of power so lost, we claim to save from twenty to forty by substituting cut gears for cast. Try us.

R. D. NUTTALL CO., Allegheny, Pa.

SHAPERS in two sizes.

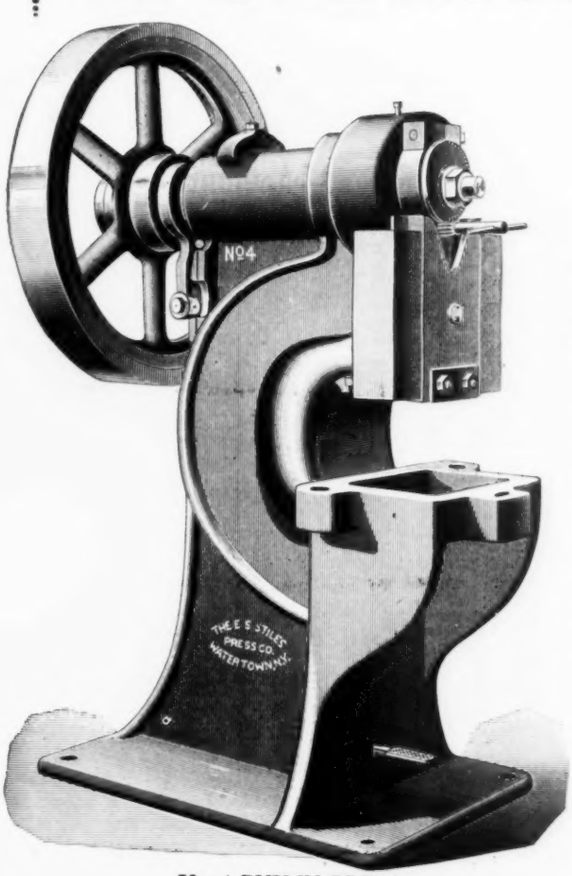
The E. S. Stiles Press Co.



No. 4 PUNCH PRESS.

FLY WHEEL PUNCHING PRESSES.

THE original design of this press is too well known and appreciated to require a detailed description. It is the best designed solid frame punching press constructed, and is acknowledged the leader for its particular work. In presenting our line of punching presses we have not attempted to improve the general design, but have added to it points that will be fully appreciated by press users and make it a superior machine in many respects. The weights have been increased; the distance from bed to end of slide made greater, thereby adapting it to a greater range of dies; the ways or guides made longer, preventing side thrust and shearing of dies and punches; and shaft diameters increased. Every point that our experience has taught us would benefit the press and increase its utility, has been carefully considered and embodied in our punching presses.

We claim superiority in the following points:

FRAMES—The iron used is of the greatest strength, and is constantly tested to maintain its standard of excellence.

CLUTCH—We have adopted a new clutch which was perfected and recently patented, and is far superior to any clutch now in use. Can be run in either direction; has three points of contact in wheel with flat surface instead of round; can be arranged to stop automatically part way down if desired; it is practically instantaneous; can be backed up to release dies; allows dies to be set with absolute safety while wheel is in motion; it is very simple; all contact points are of tool steel and hardened; it is very strong; it is absolutely reliable.

BALANCE WHEELS—The faces are wide for large belts, and the greatest weight is in the rim where most needed, giving great momentum.

SHAFTS—The shaft diameters are large and are carefully turned to a perfect fit.

SLIDES—The slides are particularly long and very carefully scraped to an exact bearing.

OIL HOLES are covered with patent dust-proof covers, which prevent bearings being cut from dirt.

WE ARE THE ONLY BUILDERS OF

"STILES" PRESSES.

All persons pretending to build or offering for sale presses represented directly or by inference to be *"STILES"* presses, will be prosecuted to the fullest extent of the law, and this is the *last* notice we shall give them to this effect.

We have already stopped some unprincipled persons who not being capable of originating any design of merit of their own, have copied our designs, and then had the assurance to advertise that *"The Original Design of these Presses is too well known and appreciated to require a de ailed description, etc."* They *are* well known, and that knowledge, "the original design," and everything else belonging to *"STILES"* presses is the property of The Stiles & Parker Press Co. and E. W. Bliss Co., and we propose to make it our business to see that imitations are not sold to the trade by any misrepresentation.

ROLLING MILL
For Sale or Lease.

The property known as the Seyfert Rolling Mills is offered for sale or lease.

This Mill is located on the Wilmington & Northern R. R., five miles from Reading, Pa., and is equipped for making Sheared Pipe Skelp, Sheet Iron, Plate Iron and Puddled Bars.

The property is in perfect condition and can be started up in 24 hours time. Is, without doubt, one of the best mills in the state; has always been a money-maker and should prove a very desirable and profitable investment to anyone desiring to go into the iron business.

This Mill would be indispensable to the Wrought Iron Pipe Trust now forming.

For terms or particulars, apply or address

HERO STAMPING WORKS,

Room 405, Cuyahoga Bldg., Cleveland, O.

Locations for Industries.

The Chicago Milwaukee and St. Paul Railway Company has all its territory districted in relation to resources, adaptability and advantages for manufacturing, and seeks to secure manufacturing plants and industries where the command of raw material, markets and surroundings will ensure their permanent success.

A number of new factories and industries have been induced to locate—largely through the instrumentality of this company—at points along its lines.

The trend of manufacturing is Westward. Confidential inquiries are treated as such. The information furnished a particular industry is reliable.

Executor's Sale to Close an Estate

OF

Valuable Coal, Timber & Farming Lands

In Somerset County, Pa.

6,000 ACRES MORE OR LESS.

ADRIAN H. MULLER & SON

will sell at auction on

TUESDAY, APRIL 4th, 1899,

At 12 o'clock noon, at the N. Y. Real-Estate Salesroom, No. 111 Broadway, New York City.

This property is about 2¼ miles west of WEST SALISBURY STATION on the SALISBURY BRANCH, BALTIMORE AND OHIO R. R., which is a good shipping point; the Railroad having surveyed for an extension of their road to within ½ mile of these lands, makes it easy of access. The Mutual Telegraph Co. run over the lands around the public roads.

THESE LANDS are underlaid with BITUMINOUS COAL, FIRECLAY, IRON ORE and LIMESTONE, and have a fair average of the several kinds of Timber grown in this section, viz.: WHITE OAK, RED OAK, HEMLOCK, ROCK OAK, ASH, POPLAR, CHERRY, BLACK BIRCH, CHESTNUT, etc.

After the timber is cleared off, will make good farming and grazing lands, being well supplied with running streams.

THE ATTENTION OF COAL COS., IRON AND COAL MINERS, AND RAILROAD COS., ALSO CAPITALISTS, IS CALLED TO THE SALE OF THIS PROPERTY.

50 PER CENT. may remain on **BOND AND MORTGAGE** at 5 per cent. interest for One Year or all cash if desired. **Reports of E. V. D'Anvilliers, Geologist and Mining Engineer,** of **Philadelphia,** and other particulars can be had at the **Auctioneers'** office, **24 Pine Street, N. Y. City.**

For Sale.

FOR SALE

Bessemer Plant and Blooming Mill

of the North Branch Steel Company.

Plate Mill For Lease

SITUATED AT : : : : DANVILLE, PA.

The Steel Plant is entirely new and practically ready for operation; it contains two 5-ton vessels and a 32-in. reversing Blooming, Slabbing and Billet Mill. If desired, its 28-in. Plate Mill, which is situated only a short distance from the Slabbing Mill, could be leased.

Danville is on the line of the Catawissa Branch of the P. & R. R. R. and the Bloomsburg Branch of the D., L. & W. R. R.; is directly across the river from and connected by bridge with South Danville, through which a branch of the P. R. R. runs, and is within 12 miles by rail of Northumberland, through which the Northern Central Branch of the P. R. R. passes.

There is a good home market for a part of the product of the above plant, and the starting of it up would make Danville an excellent location for a Tin Plate Works. Full information may be obtained of

THE NORTH BRANCH STEEL COMPANY,
25th St. and Washington Ave., - PHILA., PA.

KEASBEY & MATTISON CO., Ambler, Pa.

FOR SALE.

The Somersworth Machine Co.

The extensive plant and business of The Somersworth Machine Company, located at Dover and Salmon Falls, N. H., is offered for sale.

The Dover plant is located sixty-eight (68) miles from Boston and forty-eight (48) miles from Portland, and consists of 19 buildings and 9 acres of land, situated alongside the tracks of the Boston & Maine R. R., from which a spur track runs to the loading and unloading points of the shops. The shops have a first class power plant of 80 H.-P., and the electric light, heating and sprinkling systems are complete.

The Foundry has two (2) large cupolas one 48 in. diameter and the other 60 in. diameter. It is built of brick, 200 by 50 ft. with monitor roof 33 ft. high. The core room is 40 x 40 ft. and the core sand room is 30 by 20 ft.

The Machine Shop is of brick, one story, with the monitor roof 26 ft. high, and is 270 by 70 ft., and is well equipped with machine tools and machinery for a job shop.

The John A. White Co. Machine Shop is of brick, one story, with monitor roof 25 ft. high, and 100 by 70 ft. In this department there has been manufactured wood working tools and machinery well known to the trade.

The Stove Works at Salmon Falls are situated on the Western and Northern divisions of the Boston & Maine R. R., and are 74 miles from Boston and 48 miles from Portland. The plant has been in operation since 1848, manufacturing heating and cooking stoves, furnaces, sinks, hollow ware and all castings pertaining to the trade, and has put upon the market over 60 different patterns of stoves and there are 100,000 in use in New England to-day.

The plant consists of 22 buildings, 40 acres of land and 8 tenement houses containing 14 tenements. Has an electric light system, and a nickel plating plant installed last year. The property is in excellent condition and has a well established and profitable business.

The above described plant of the Somersworth Machine Co., including the stock, patterns, machine tools and good will, will be sold as a whole or divided up as may seem desirable. For full particulars and descriptive list of the Real Estate, Machine Tools and Machinery and the manufactured product of the business, address the undersigned,

B. FRANK NEALLEY, Assignee, Dover, N. H.

Turret Head Screw Machines For Sale.

Desiring to reduce the number of hand Screw Machines that we have so that we can use the space for other business, we offer for sale the following machines, which can be seen on the premises during working hours.

Paris Exhibition

INTENDING EXHIBITORS, who have not yet completed their arrangements for representation, are invited to correspond with us. We are prepared to take charge of exhibits from factory to exhibition grounds, and return, attending to all the work entailed. Our Paris Branch has moved into new spacious quarters at No. 76 Rue de Turenne, and is equipped with a numerous staff of well-trained commercially and mechanically skilled assistants, who speak the language of the country. We are particularly well situated to do work of a nature apt to produce the best practical and profitable results. We are prepared to finance and guarantee approved transactions, that may offer themselves in connection with the Exposition.

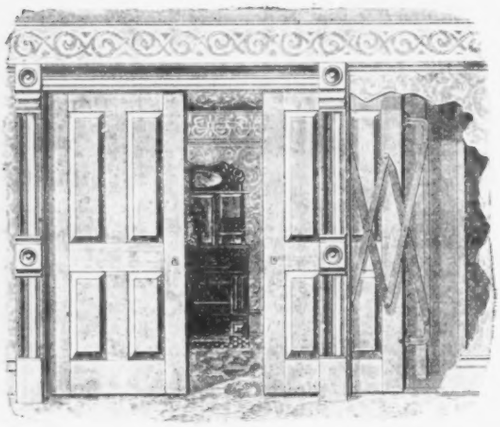
THE McGUIRE TRACKLESS SLIDING PARLOR DOOR HANGER.



No special framing. Ordinary pockets only required. No opening above doors. Head solid and in one piece. No disfiguration whatever. No wheels used. The movement is parallel with the head and floor. Doors run extremely easy, without noise. Any carpenter can apply a pair of hangers and doors in less than two hours. Hanger butts applied to jamb casing same as the ordinary swinging butt. Hangers may be applied and doors hung after all plastering is done. The hanger and door can be removed entirely from the pocket without injury to woodwork or plastering. This hanger can be applied to any overhead track door that may be working badly, without expensive changes—none being necessary. Made all of steel and guaranteed. A great many of these hangers are in use, giving perfect satisfaction, and acknowledged the best by all who have seen them. In fact, they are perfect. Write for full descriptive catalogue.

Circulars and Folders—differing radically from such as you *two* (i. e., yourself and your waste-paper basket) have so long been accustomed to;

Price-Lists and Catalogues—especially small ones, to enclose with your regular correspondence, easily made to cover considerable "ground" in an inconsiderable space—also larger ones, of course,

Trade Primers, Circular Letters, Announcements, Mailing Cards, Booklets, Notices, Newspaper, Periodical and Trade Journal Advertisements.

Miscellaneous Missives to meet some special requirement—the "skeleton" of which you furnish, the tissue to cover its "bones" being my concern—and so on "ad infinitum."

All such things as the above made in a manner suggesting a patient attention to details, perhaps also some ability to obtain and adapt pertinent data from outside sources—nothing, however remotely, suggesting "*omniscience*."

I am not an "Expert"—distinctly not. I desire correspondence from advertisers who claim to know a good thing when they see it. From readers of this, inclined to be somewhat skeptical, I especially desire to hear.

NOTICE.

BEING advised by many retailers and consumers that when they place orders with jobbers for Star Hack Saw Blades other brands are frequently substituted, we desire to notify all parties that we will, upon request, either furnish names of jobbers throughout the country who will supply the Star blade, or else we will send what is wanted ourselves. Each dozen blades are labeled with the brand, etc. Don't be misled when blades are supplied without labels, but look for the ★ which is stamped in every blade we make near the pin hole. Our Star blades have become very staple, and some dealers attempt to increase their profits by substituting goods which they buy at lower prices.

IMPROVED

Young America Scale.

It is Made of Steel. White Tile Top. Tin or Brass Scoop Top. Brass Dial.

BEST IN THE WORLD

A most beautiful and attractive scale for all purposes. Beautifully enameled, ornamented and striped. Weighs 20 pounds by ounces. Occupies but little space. Is light and easily moved. It can be regulated by turning the brass screw on top. It is always ready and easily understood. It is a convenient scale to use and has no weights that may be lost. You can look this one in the face to prove its accuracy without looking for weights. Every scale examined before leaving the factory and warranted correct.

IMPORTANT DECISION RELATING TO THE

HEINISCH

TRADE-NAME ON SHEARS, TRIMMERS, &C.

The U. S. Circuit Court, Southern District of New York, Judge Townsend, has rendered a decision in the suit of "R. Heinisch's Sons Co. vs. Hermann Boker & Co."

"The Complainant is entitled to an accounting, and to an injunction restraining them from using the names 'Heinisch' or 'H. C. Heinisch' on its Shears, Labels, etc., and otherwise, in any way which will interfere with Complainant's enjoyment of the benefits of its Trade-name."

Referring to the above decision we would respectfully state our determination to protect our rights in the premises and warn all persons against any imitation of our Trade-name.

PEARCE'S IMPROVED CAHOON PATENT BROADCAST SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The CAHOON is not the lowest price seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two-thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the CAHOON make a profit and a satisfied customer at the same time. They stay sold. A prominent hardware dealer in the South wrote us under date o f Feb. 13, '99, "We are not handling any other broadcast seeder similar to yours. Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principa distributing points.

GOODELL COMPANY,

ANTRIM, N. H.

The '98 Chicago Clipper Retails For $8.75.

HARDWAREMEN—DO NOT ORDER

another old-fashioned. out of date two-hand horse clipper. Be enterprising and order the '98 CHICAGO CLIPPER. The greatest clipping machine ever invented; holds the world's record for fast clipping; time 14 minutes. You can sell one of these machines to every man who used to buy the old fashioned two-hand variety. Ask your jobber about them or send to us direct.

HAIR CLIPPERS.

If you want a clipper "with a reputation" insist on the "Stewart Patent." There is no other "just as good" and they will cost you no more than the inferior kind.

We have just been awarded Gold Medal at Trans-Mississippi Exposition, highest and only award for horse clipping, sheep shearing and cattle grooming machines.

Dry Battery Portable Electric Safety Lamp...

This is an Electric Lamp set in a White Enamel Parabolic Reflector, and can be attached to the cap or any part of the clothing by means of a stick-pin attached to reflector and connected to the battery with a flexible cord. The battery is arranged to be carried on a belt or in the pocket. So the user has free use of hands. The current can be turned off when not in use. Dry batteries are used and can be recharged from direct Incandescent Electric Current Charger and full directions go with each Lamp.

IS USED BY THE FOLLOWING: For Watchmen, Miners, Mine and Gas Inspectors, Boiler Shops, Oil and Gas Works and Gas Fitters, City Sewer and Underground Cable Inspectors; Powder Mills and Warehouses where explosive materials are manufactured and stored; exploring cellars and trenches where leaks occur, and investigating pipe connections where it is impossible to carry an oil lamp or candle for fear of explosion—and all parties requiring a safe portable light. The whole outfit is neat and compact.

No. 1 weighs 2 lbs., 1½ C. P. Price complete, $4.00. For Meter Reading Only.

No. 2 weighs 3 lbs., 4 C. P. Price complete, $6.00. For General Use.

YUKON *Refrigerators.*

The Yukon combines all the best points of the best makes with several new features, which makes it the best Refrigerator on the market.

The Yukon is made in two styles, with ***Removable Flues,*** and with the ***entire Ice Chamber Removable.***

We note some of the excellent features of the Yukon:

Thoroughly seasoned ash lumber.
Elegance of finish.
Carved panels.
Swinging and removable base board.
Solid bronze hardware, Roman gold finished.
Zinc lined. Patent casters.
Galvanized iron flues, ice rack and shelves.

The shelves being so constructed that small dishes placed upon them will not tip over.

Patent Trap, connected with waste pipe in bottom of provision chamber, where it is most accessible, both trap and waste pipe being easily removed cleaned and replaced, without a back-breaking process or poking with a stick.

The insulation used is ***Granite Rock Wool*** and Charcoal Sheathing.

Buy the Yukon and you will have the best Refrigerator made as well as an elegant piece of furniture.

THE TOLER

Liquid Door Check and Spring

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong simple and effective**, giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material through out.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

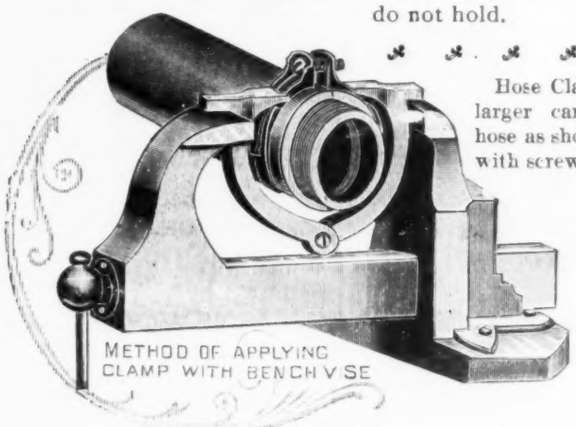
127 Duane St, New York.

A CURE FOR LEAKY HOSE

is for the dealer to order all hose coupled with ***SHERMAN CLAMPS,*** as that will remedy many leaks that come from wire bands that stretch or cast clamps that break and do not hold.



Hose Clamps 1 in. and larger can be put on hose as shown in cut, or with screw driver alone.

Small sizes ½ and ¾ in. for lawn hose are applied to hose with screw driver alone.

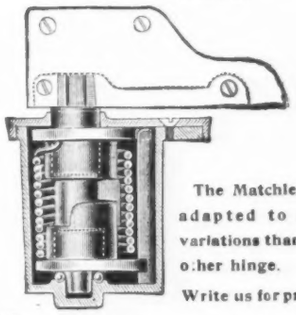
SOLD BY ALL JOBBERS.

Manufactured by **H. B. SHERMAN MFG. CO., Battle Creek, Mich.**

THE MATCHLESS

Double-Acting Floor Hinge.

BALL BEARING.



The Matchless is adapted to more variations than any other hinge.

Write us for prices.

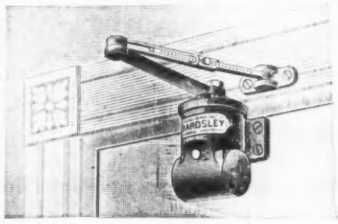
LAWSON MANUFACTURING CO.,

MAIN OFFICE:

Chicago. Milwaukee, Wisconsin. New York.

THE "BARDSLEY"

Oil Door Check and Spring



HAS new and improved features; is free from packing friction; the checking power can be released when the door is near the closing point; more oil can be added when needed without taking it from the door and it can be readily taken apart with the aid of a screw-driver when repairs are necessary.

The MILBRADT ROLLING Step Ladders

that were put up 15 years ago are still working entirely satisfactorily. Since then they have been improved a great many times, and we now only repeat the language of our customers when we say: "We do not see how you can make any further improvements on the ladders, as they are perfect in every respect."

The ***Milbradt Rolling Step Ladders*** are made to order and to fit all kinds of shelving, in various styles to suit all purposes, and are especially adapted for Hardware Stores. Write for Catalogue.

GLIDDEN'S METALLIC REPAIR OUTFIT

The one that has the Hinged Plugs.

THIS is the smallest, neatest, most compact and practical repair outfit ever offered to the public. Complete in a tin box 1½ inches long, 1 inch wide and ¼ inch thick. It will repair a puncture at once, without the use of cement, and any woman or child can use it. The plug is made of metal with a **hinged head, which can be forced into a much smaller opening than one with a stationary head.** Two sizes of plugs are furnished with each kit, which will fit ordinary punctures; also a cutter is furnished, to be used when the puncture is too small to admit the plug.

Directions for use. Place the flat plate of the plug so it will be loose on the key. Screw the key into the plug and insert into the hole, leaving the flat plate on the outside of tire. Draw back the key so that the plug will rest flat on the inside of the tire. Screw the flat plate to plug with wrench (left hand thread), and turn key to right. Remove the key by turning to left, and you have a permanent repair which does not injure the tire or its looks.

DISCOUNT TO THE TRADE, ASK YOUR JOBBER FOR IT.

JUST PUBLISHED.

A Manual of Practical Methods of Repairing Bicycles.

By S. D. V. Burr.

Fourth Edition, Revised and Enlarged.

Cloth Bound. 208 Pages. 205 Illustrations

THE BICYCLE is treated as a machine composed of many parts, each of which may be damaged to a greater or less extent. Each injury to each part is discussed fully, and the best methods of making the necessary repairs are explained thoroughly. The treatment of assembled parts, in such operations as brazing, nickel plating, enameling and the like, is described in detail.

Almost every topic is illustrated with one or more original engravings.

The book deals with the simplest and most useful appliances for repairing. It is in every way practical. It is recommended not only to manufacturers of bicycles, but more particularly to all those who handle bicycles, whether as dealers or repairers.

Price, Post-paid, One Dollar.

AND HAMMOCK SUPPORTS.

The above Figure shows Hammock swung on Adjustable Support, the occupant in a comfortable reclining position as used on a Lawn.

SOLE MANUFACTURER.

I. E. PALMER,

Middletown, Conn., U. S. A.

New York Office, - - 62 White Street.

Send for our New Catalogue for 1899.

INFRINGERS ARE BEING PROSECUTED.

PALMER'S ARAWANA (Patented).

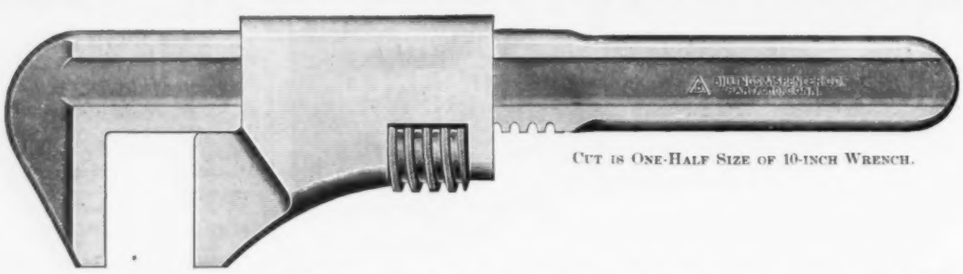
As used with Trapeze Suspension

CUT NO 162.

The above figure shows an Arawana slung from a Trapeze adjusted to its maximum extension as regards its suspension from the ceiling.

The Trapeze Suspension, as may be seen at a glance, is especially adapted to Veranda use, is adjustable to different sizes of Hammocks within its scope (from 6 ft. 3 in. to 11 ft.), and to giving different degrees of dip and heights of suspension. Every conceivable swinging motion is obtained without effort.

BILLINGS' NEW ADJUSTABLE WRENCHES.



CUT IS ONE-HALF SIZE OF 10-INCH WRENCH.

Made in Three Sizes, 10 inch, 14 inch and 18 inch.
Two Styles of Finish.

LADD'S DISCOUNT BOOK.

For Example, we desire to find the net of $73.00 at discount 65, 20, 7½, 5 and 2½ per cent. By the old way we take our pencil, and, after a deal of figuring, conclude (if we haven't made an error) that the result should be $17.51, but we are not sure of it till we prove it. By the new way (the use of Ladd's Discount Book), we put our finger right on it in a moment, and know that the result is correct.

The book contains over 100,000 computations, and is indispensable where percentages are employed. Price, per mail, $3.00. Double Indexed Edition, $4.00.

NEW YORK, Nov. 26, 1897.

NORTH AMERICAN METALINE CO., 43 Third St., Long Island City, N. Y.

Gentlemen: Your favor of 20th inst. received; in reply are pleased to say that your Metalined Bushings have given us entire satisfaction. We first applied them in 1886 or '87 under very trying conditions, put them in fast running loose pulleys with high tension belt, and they gave perfect satisfaction. Since then, we have extended their use throughout our works, and they have given satisfaction wherever we have placed them. Very truly yours,

JAS. PYLE & SONS.

New "Cold" Process of Galvanizing.

In use for more than two years with best and absolutely satisfactory results. Articles that cannot be galvanized by any other process, such as screws, nuts, cutting instruments, tools of every description, springs, locks, artistic metal articles, can be galvanized in a superior manner by this process. The multitude of articles that can be galvanized is without limit. Uniformly smooth surface is preserved, thickness of coating can be regulated, saving of spelter about 80%, besides many other advantages. *We grant licenses for territory, also shop rights on royalty basis.*

GALVANIZING DONE AT OUR PLANT.....
9-11 Franklin St.

U. S. Electro Galvanizing Co.,

"Lang Lay" Wire Rope.

Wires and strands twisted in the same direction. Why? To get a longer bearing surface on the wires.
Advantages claimed are greater flexibility and longer life. There's a trick in making it, but we sell it at the same price as ordinary wire rope.
If you don't want this we can give you the regular lay, and also ropes for special applications. Also equipments for Wire Rope Tramways, Cable Hoist Conveyors, Surface and Underground Haulage, etc.

Fulton Engineering & Ship Building Works

San Francisco Sept. 29/98.

Hoyt Metal Co.,
St. Louis, Mo.
Gentlemen:-

Reporting on the merits of the Nickelene Babbitt Metal, we have used a large quantity of it with the most satisfactory results. It has given better satisfaction than any other babbitt metal we have used, including all the standard brands, particularly for electric and marine engine bearings where it is subject to the severest duty.

We will be pleased to give you or others the names of steamers using it, also the names of their engineers and owners to whom any one can write. Without exception we believe, that all will speak favorably of it and from our own experience with it and other metals we decidely recommend it.

Very truly,
FULTON ENGINEERING & SHIP BUILDING WORKS.

Dict. by J. S. Sr. James Speirs Pres

YOU WILL SEND US AN ORDER.

Nickelene, although very hard, is so tough that it can be hammered to a knife edge.

Nickelene is being used by many in place of Phosphor Bronze.

Nickelene can be melted in an iron ladle or kettle, and at a little higher temperature than that necessary for melting Babbitt Metal, runs freely and makes a good casting.

NICKELENE IS THE BEST BABBITT METAL IN THE WORLD.

WRITE US FOR PRICE.

Our Lawn and Stock Fence never sags and gets loose. Send for Catalogue and prices.

Kilmer Wire Mfg. Co.
Chicago, Ill.

We manufacture all styles of Hay Bale Ties.

Be Progressive

and use Aluminum Coated Sheet Steel.

Superior in all respects to galvanized iron. It contains all its merits, with none of its defects. It is united more firmly to the base, consequently does not peel like galvanized iron. It can be heated to a red heat without destroying the coating. Sulphurous gases, brine, salt and acids do not affect it as readily as galvanized. It can be soldered with common solder. It is the only metal that will hold kerosene, gasoline and all other carbon oils satisfactorily. Give it a trial and be convinced. Prices and samples furnished on application.

Manufactured by the STEEL AND IRON METAL COATING CO., WEST CHICAGO, ILL.

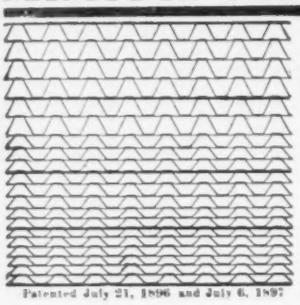
E. T. BARNUM, Detroit, Mich.

M.M.S. Poultry FENCING



Patented July 21, 1896 and July 6, 1897

is made of the best number nineteen galvanized steel wire, strengthened by a cable selvage and a cable every foot in the height of the fence.

A Fence, Not a Netting.

Its multitude of horizontal wires gives it strength, makes it easy to erect and keeps it in good shape.

50% Saving to the User.

It requires but few posts and no top or bottom rail. Only genuine when **every roll contains the famous M. M. S. trade mark.** Descriptive matter free.

DE KALB FENCE CO., 327 High St., DE KALB, ILL.

Corrugated
ROOFING
Iron or Steel.

WITH our improved machinery we make none but perfect sheets—uniformly straight, free from holes, warp and all imperfections. Every corrugation is a channel in itself, carrying off its share of water quickly, not allowing it to remain and flood at the joints. Write for circular.

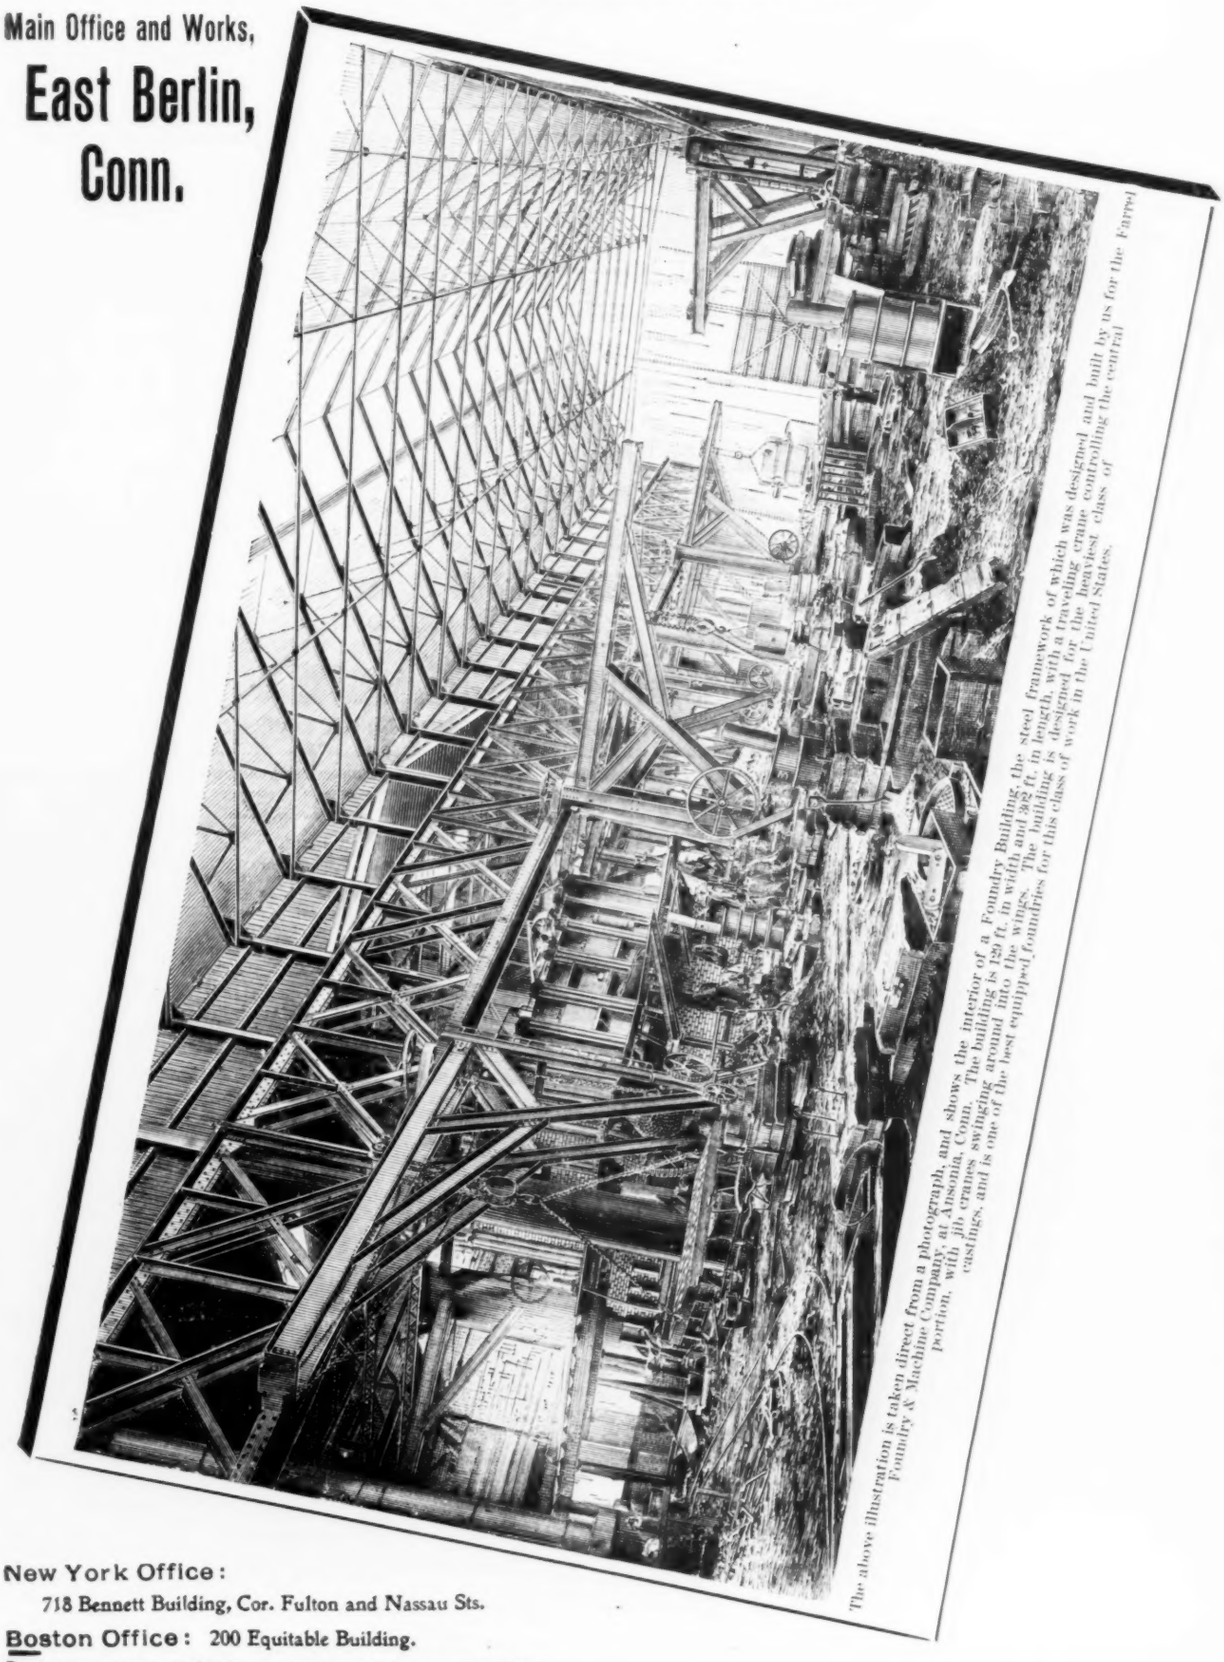
Main Office and Works,

East Berlin, Conn.



The above illustration is taken direct from a photograph, and shows the interior of a Foundry Building, the steel framework of which was designed and built by us for the Farrel Foundry & Machine Company, at Ansonia, Conn. The building is 120 ft. in width and 382 ft. in length, with a traveling crane controlling the central portion, with jib cranes swinging around into the wings. The building is designed for the heaviest class of work in the United States. castings, and is one of the best equipped foundries for this class of

ATLAS METAL.

TENSILE 50,000 POUNDS.

Atlas Metal is defined by Prof. Charles James, the well-known Steel Expert, as "A New Commercial Product, standing between Iron and Steel, and uniting in itself the best characteristics of both."

ITS CHIEF POINTS ARE

GREAT STRENGTH. GREAT WEAR. UNIFORMITY. EASILY MACHINED.

HOMOGENEOUS.—Atlas Metal is not surface treated—the castings can be made of any weight, size or thickness, and the metal will be of uniform structure and entirely homogeneous throughout.

CORRESPONDENCE SOLICITED.

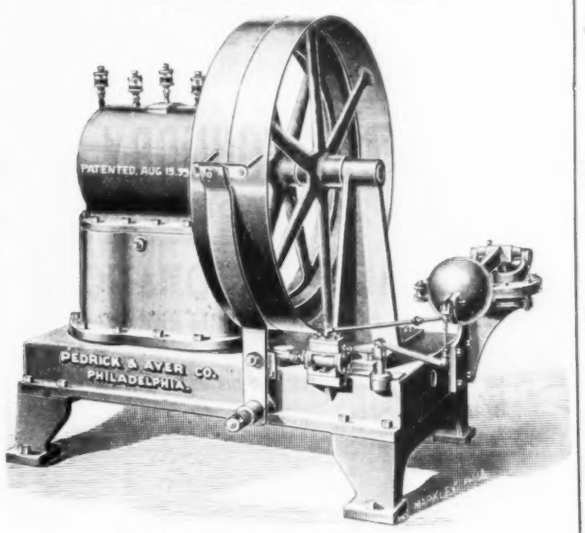
Automatic Compound Belt Air Compressors.

PATENTED AUGUST 13th, 1895.



Straight Lift Hoist. *Built in two sizes, Nos. 1 and 2.*

No.	Size of Cylinders in inches.	Revolutions per Minute.	Cubic Feet of Free Air	Horse Power required.	Size of Pulleys in inches.	Shipping Weight of Compressor	Floor Space in inches	Telegraphic Symbol
1	11x 6 6x 6	100-160	32- 50	2-3 5	40X5	2875 lbs.	60x40	Parian
2	15x10 8x10	90-120	90-130	5-15	60X6	5370 lbs.	76x60	Parish

Horizontal Hoist.
Pat. Sept. 4th, 1894.

Air Hose Coupling
For ½ inch, ¾ inch and 1 inch Hose.

These Compressors will compress more air at less cost than any other make, requiring no attention other than oiling; entirely automatic in action, stopping and starting as air is required. Specially adapted for foundry use. Can be run in series; if so, no stoppage possible.

Horizontal Air Lift for low ceilings; for general lifting; quick in action and under perfect control of operator. Straight Air Lift for foundry purposes; when equipped with retaining and releasing valve will hold the load, whether heavy or light, in the desired position, as in case of lifting a ladle of molten iron and pouring it, or raising a flask to knock out the sand. It can neither ascend nor descend as long as connected to air supply.

Air Hose Couplings are designed to do away with long lines of hose. By having suspended along the air line a number of hose equipped with this device, connections can instantly be made or disconnected, allowing one hoist to serve in different places. Each size made in duplicate. Containing a shut-off valve.

Pumping Hot Water.

Some engineers are disinclined to use an "open" heater because of the trouble which they or their friends have had in getting their pumps to handle water at a temperature of over 150° to 160°. Now, a COCHRANE HEATER will deliver water close to 212°, and it is

JUST AS EASY

to put water at this temperature into boilers as it is to feed cold water—and think of the saving, as well as the advantage to the boilers, of a right hot feed which will do away with contraction and expansion strains!

EVERYTHING IN KNOWING HOW.

We can put you on to all of the little "kinks" of how to do it without trouble, and without expense, for you must remember that we have the experience that came from installing hundreds of thousands of horse power of these "Cochranes," which are running satisfactorily today.

If anyone interested in the subject will take the trouble to write us, stating just how he has connected up his pump, or asking us how to pump hot water, we will take pleasure in telling him, but he runs the risk of hearing something about the good points of our COCHRANE HEATERS if he does write us.

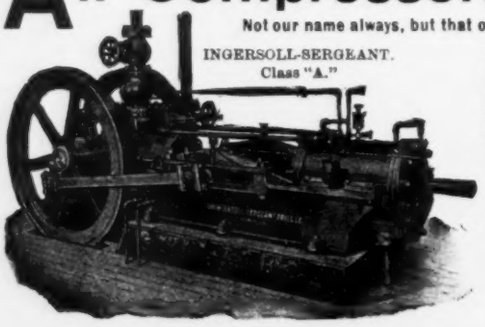
Air Compressors Catalogue No. 32.
Not our name always, but that of others to show what can be done.


INGERSOLL-SERGEANT. Class "A."
The Passaic Rolling Mill, Paterson, N. J., with a monthly output of 5,000 tons of structural steel, use 40 cylinder hoists, 12 riveters, 5 drills and reamers, 2 chipping tools and other apparatus, all operated by compressed air from an Ingersoll-Sergeant Class "A" Straight Line Piston Inlet Air Compressor. The plan of distribution of air power necessitated careful engineering and close investigation of the merits of Air Compressors to secure good results. It is the high-class machine, built rigidly, embodying every detail of scientific construction, that wins in a test like this.
Catalogue No. 41, ROCK DRILLS Mines, Quarries, Tunnels, Contract Work, Good Roads.
Catalogue No. 72, POHLE AIR LIFT PUMP Water Works, Railroads, Factories, Irrigation, Etc.
The Ingersoll-Sergeant Drill Co., Havemeyer Building, New York.

Don't be misled into thinking that you will save money if you buy a second-rate steam or electric pump. Such an investment is poor economy. You will find after you have used a cheap pump a little while that your money has been literally thrown away. The various amounts you will be forced to spend for repairs from time to time will lighten your purse. Purchase a Worthington machine. There is no better on the market. If you have not a copy of our catalogue, we will be glad to forward one on receipt of request.

CRANES • HIGH • SPEEDS • ELECTRIC • STEAM • HAND • MACHINERY FOR HANDLING **COAL** AND **ORE** WORKS

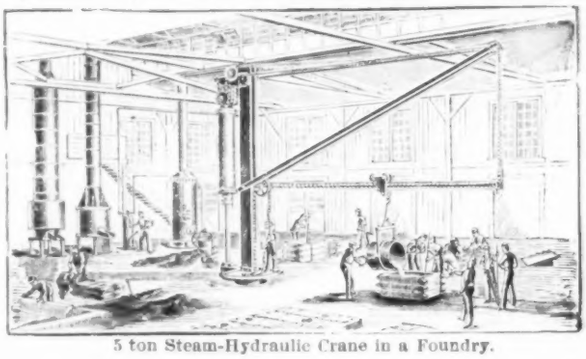
THE BROWN HOISTING AND CONVEYING MACHINE CO CLEVELAND, O.
NEW YORK 26 CORTLANDT ST • LONDON 39 VICTORIA ST. S.W.

WE HAVE A THEORY

That a crane cannot be too good.

A crane is a "stand-from-under" machine It always works over the heads of men. In a live going place there is scarcely a minute of the day some one is not under a crane. If crane fails some one is bound to be hurt.

Yet some men—not you—but some men buy cheap cranes. There are lots of cheap cranes to be had and lots are sold and oh! the long wail that comes into our office from Monday morning until Saturday night: "Ridgway, can you change our cranes to your style?" "Ridgway, can you attach your oil governed hoist to our cranes?" "Ridgway, we wish we had known about your cranes before we got these rattle traps!" And thus it goes. They wanted cheap cranes and they got 'em.



5 ton Steam-Hydraulic Crane in a Foundry.

It's easy enough to build a crane cheap. We could take a Ridgway Crane and skin it all over from foundation plate to top steadiment and may be it would not cost very much. But excuse us! Ridgway Cranes are not man killers. Ridgway Cranes have a name and a reputation for excellence. Because when once erected and put to work that is the end of them so far as cost is concerned; they are in consequence the cheapest, of cranes. No repairs, no breakdowns and delays, no hurt men, no damage suits. We put the stuff into Ridgway Cranes, the best stuff too and lots of it.

Hydraulic Air Hoists,

Which they are not at all, work by air direct same as any other air hoist. We put some oil in the hollow piston rod and that makes the machine an hydraulic. We cannot tell all about them in an advertisement like this. We have circulars for the mere asking. No drummer attachment to the circular either.

The best way is for you to get JUST ONE and try it for yourself. The machine at work for you will tell the whole story.

"Please Take The Elevator."

Let the steam pipe lift your stuff for you.

A Chuck that Holds.

The trouble with ordinary chucks is that the jaws have to centre the tool and drive it too. It's too much: like an overloaded horse, they slip, and wear out, and break down.

In the Pratt Chuck the jaws have only to hold the tool perfectly true; the positive driver does the driving. It can't slip, even if the jaws are not tightened.

It pays to have tools that will always keep at work.

The Honest Foot Press.

A good Foot Press is a paying investment. Many times a job can be handled on it faster than on a Power Press, and, properly equipped, it beats a drill out and out on sheet metal work. There are many kinds—good and poor. Some are too light—spring. Some work too hard—tired operator. Some have poor adjustment—ruined dies.

We make a good honest Press in toggle lever and pendulum styles; built for steady, continuous use. They work easily and are well fitted. We can furnish a Press that will please you.

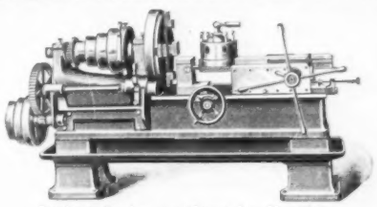
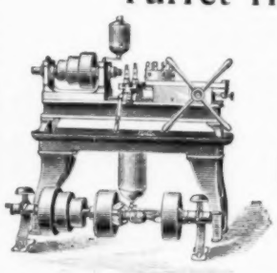
Facing and Chucking Machines



24-Inch Facing and Chucking Machine.

For boring and squaring up hubs of pulleys and finishing sides of gear blanks, with one set of tools at one setting of the casting. **Turret Slide Supports** insure rigidity and accurate work. Made in two sizes, with face plates 15 and 23 inches in diameter.

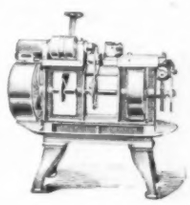
Turret Head Machines and Tools



For boring and facing hubs of pulleys and gears; for finishing keys and joints for gas fixtures, air cocks, electric apparatus and for turning, forming and threading irregular pieces of circular cross section in brass, iron and steel. Movements of slides by hand lever, hand wheel, pinion and rack, or by power. The heads are often made with friction clutch back gears, to facilitate quick change of speed of spindle when light and heavy cuts are required on one piece.

Screw Head, Slotting and Shaving Machines. Milling, Die Sinking, Profiling, Bolt-Threading and Drop Forging Machinery.

Hartford Automatic Screw Machines



In eleven sizes, for Making Screws, Studs, Bicycle Hubs and other pieces of circular cross-section and various outlines from bars of round, square, or hexagon metal, in diameter $\frac{1}{16}$ to $3\frac{1}{2}$ inches. All needed adjustments are provided for. One boy may attend a half dozen machines. Tools made to order for finishing pieces to sample. A full line of Bicycle Making Machinery. Factories fully equipped with Machinery, Fixtures, Small Tools and Gauges for the manufacture, on the interchangeable plan, of Guns, Sewing Machines, Typewriters, etc.

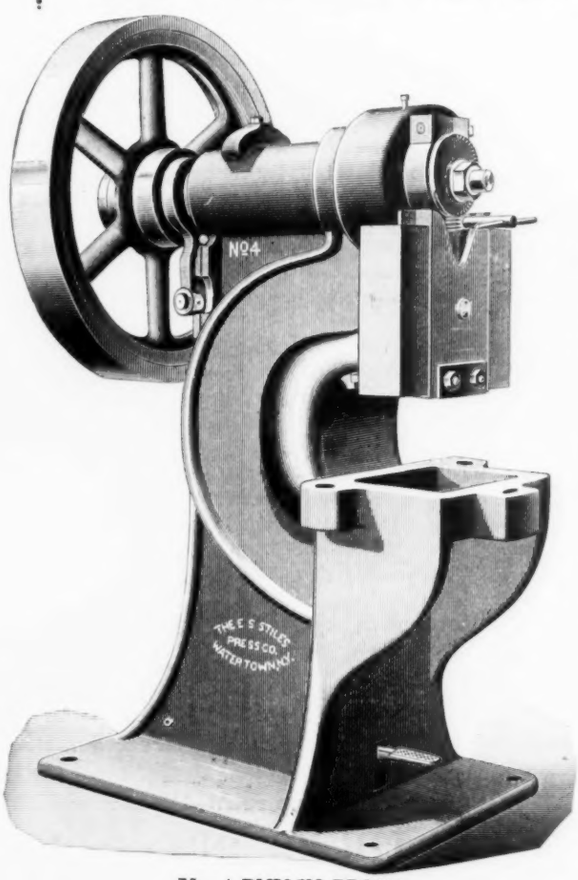
The E. S. Stiles Press Co.



No. 4 PUNCH PRESS.

FLY WHEEL PUNCHING PRESSES.

THE original design of this press is too well known and appreciated to require a detailed description. It is the best designed solid frame punching press constructed, and is acknowledged the leader for its particular work. In presenting our line of punching presses we have not attempted to improve the general design, but have added to it points that will be fully appreciated by press users and make it a superior machine in many respects. The weights have been increased; the distance from bed to end of slide made greater, thereby adapting it to a greater range of dies; the ways or guides made longer, preventing side thrust and shearing of dies and punches; and shaft diameters increased. Every point that our experience has taught us would benefit the press and increase its utility, has been carefully considered and embodied in our punching presses.

We claim superiority in the following points:

FRAMES—The iron used is of the greatest strength, and is constantly tested to maintain its standard of excellence.

CLUTCH—We have adopted a new clutch which was perfected and recently patented, and is far superior to any clutch now in use. Can be run in either direction; has three points of contact in wheel with flat surface instead of round; can be arranged to stop automatically part way down if desired; it is practically instantaneous; can be backed up to release dies; allows dies to be set with absolute safety while wheel is in motion; it is very simple; all contact points are of tool steel and hardened; it is very strong; it is absolutely reliable.

BALANCE WHEELS—The faces are wide for large belts, and the greatest weight is in the rim where most needed, giving great momentum.

SHAFTS—The shaft diameters are large and are carefully turned to a perfect fit.

SLIDES—The slides are particularly long and very carefully scraped to an exact bearing.

OIL HOLES are covered with patent dust-proof covers, which prevent bearings being cut from dirt.

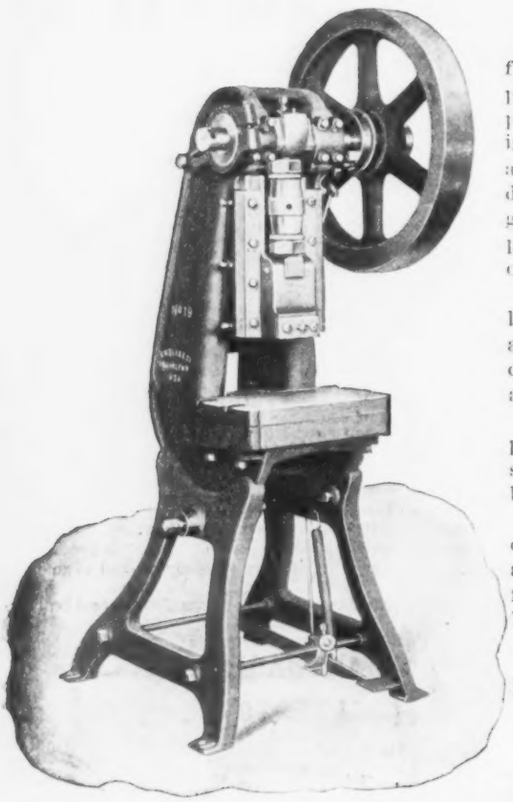
"Bliss" New Pattern Inclinable Press.



"Bliss" New Pattern Presses Nos. 18-21.

There is probably no type of power press that has met with such general favor among manufacturers of sheet metal goods as the line of inclinable presses illustrated, which we designate by the numbers 18 to 21. This line of presses has been recently re-designed, embodying all the latest and best ideas in press construction known to the trade. Experts in press construction will at once appreciate the straight line principle adopted, which not only produces a graceful appearance, but also a much more rigid frame, resulting in greater strength with the same amount of metal. The weight of these presses has also been increased, making a much greater increase in strength over the old pattern.

The slides and gibs are very long, thus insuring the best results and longest life for dies and tools usually operated in such presses. The shafts are of the best forged steel, of large proportions and well fitted. The slide connections in the larger sizes are made of forged steel, are bronze bushed, and practically unbreakable.

Our "Bliss" Standard Clutch, but of enlarged sizes and with several improvements in the mechanism, is employed, making it the strongest and safest in use, and is to-day unequaled for general work. The fly-wheel is bronze bushed, and the bushings may be easily removed when worn.

The press frame is so constructed that feeding devices, gauges, and other attachments can be easily applied. It may also be easily inclined to any angle that best suits the operator. It is built in several sizes, both as fly-wheel and geared machine, ranging in weight from 300 to 6,500 lbs. Write for further particulars.

JOS. H. McCLURE & SON
202 Walnut Place, Philadelphia.

I buy Iron and Metal Scrap and wish to hear from anybody having cotton ties, pipe, hoops, cast borings, wrought and steel turnings, boilers, cast scrap, etc. Also wrecks from fire, etc.

ROBERT M. CUNLIFFE,
1140-42 Washington Ave., Phila., Pa.

FOR SALE.

Four fly wheels, each 25 feet in diameter, weighing 42 tons each, built in 12 segments and two centers, with rims turned and faced. We built these wheels for our own tin mills, and after a few months' use of them replaced them with heavier wheels. Will be sold low.

MACKINTOSH, HEMPHILL & CO.,
Pittsburgh, Pa.

ROLLING MILL

For Sale or Lease.

The property known as the Seyfert Rolling Mills is offered for sale or lease.

This Mill is located on the Wilmington & Northern R. R., five miles from Reading, Pa., and is equipped for making Sheared Pipe Skelp, Sheet Iron, Plate Iron and Puddled Bars.

The property is in perfect condition and can be started up in 24 hours time. Is, without doubt, one of the best mills in the state; has always been a money-maker and should prove a very desirable and profitable investment to anyone desiring to go into the iron business.

This Mill would be indispensable to the Wrought Iron Pipe Trust now forming.

For terms or particulars, apply or address

SAM'L R. SEYFERT & BRO.,
Reading, Pa.

File Factory

FOR SALE

On Saturday, April 1, 1899, the plant of the late McClellan File Co. will be sold at the Saginaw County Court House, by Circuit Court Commissioner, to satisfy mortgages about one-third the value of the plant, which will be sold entire comprising real estate, buildings and all machinery.

The factory has a capacity of 500 dozen files per day, and is one of the most thoroughly equipped file factories in the country.

Plenty of cheap fuel. An elegant opportunity on a small capital to manufacture files for the trade, or to operate it as a recutting factory. For further particulars address

GEO. J. LITTLE, Saginaw, Mich.
For Mortgagees.

MACHINE WORKS,
Passaic Ave. & New, Harrison, N. J.

FOR SALE.

The Somersworth Machine Co.

The extensive plant and business of The Somersworth Machine Company, located at Dover and Salmon Falls, N. H., is offered for sale.

The Dover plant is located sixty-eight (68) miles from Boston and forty-eight (48) miles from Portland, and consists of 19 buildings and 9 acres of land, situated alongside the tracks of the Boston & Maine R. R., from which a spur track runs to the loading and unloading points of the shops. The shops have a first class power plant of 80 H.-P., and the electric light, heating and sprinkling systems are complete.

The Foundry has two (2) large cupolas one 48 in. diameter and the other 60 in. diameter. It is built of brick, 200 by 50 ft. with monitor roof 33 ft. high. The core room is 40 x 40 ft. and the core sand room is 30 by 20 ft.

The Machine Shop is of brick, one story, with the monitor roof 26 ft. high, and is 270 by 70 ft., and is well equipped with machine tools and machinery for a job shop.

The John A. White Co. Machine Shop is of brick, one story, with monitor roof 25 ft. high, and 160 by 70 ft. In this department there has been manufactured wood working tools and machinery well known to the trade.

The Stove Works at Salmon Falls are situated on the Western and Northern divisions of the Boston & Maine R. R., and are 74 miles from Boston and 43 miles from Portland. The plant has been in operation since 1848, manufacturing heating and cooking stoves, furnaces, sinks, hollow ware and all castings pertaining to the trade, and has put upon the market over 60 different patterns of stoves and there are 100,000 in use in New England to-day.

The plant consists of 22 buildings, 40 acres of land and 8 tenement houses containing 14 tenements. Has an electric light system, and a nickel plating plant installed last year. The property is in excellent condition and has a well established and profitable business.

The above described plant of the Somersworth Machine Co., including the stock, patterns, machine tools and good will, will be sold as a whole or divided up as may seem desirable. For full particulars and descriptive list of the Real Estate, Machine Tools and Machinery and the manufactured product of the business, address the undersigned,

B. FRANK NEALLEY, Assignee, Dover, N. H.

which could command a large trade is desirous of negotiating for American Agency for United Kingdom for manufacturers' Steel Plates, Angles and Shipbuilding material generally. To pass usual British tests. Apply in confidence "BOX 175/21," London. Office of *The Ironmonger*, 42 Cannon Street.

Locations for Industries.

The Chicago Milwaukee and St. Paul Railway Company has all its territory districted in relation to resources, adaptability and advantages for manufacturing, and seeks to secure manufacturing plants and industries where the command of raw material, markets and surroundings will ensure their permanent success.

A number of new factories and industries have been induced to locate—largely through the instrumentality of this company—at points along its lines.

The trend of manufacturing is Westward. Confidential inquiries are treated as such. The information furnished a particular industry is reliable.

Executor's Sale to Close an Estate
OF
Valuable Coal, Timber & Farming Lands
In Somerset County, Pa.
6,000 ACRES MORE OR LESS.
ADRIAN H. MULLER & SON

will sell at auction on

TUESDAY, APRIL 4th, 1899,

At 12 o'clock noon, at the N. Y. Real-Estate Salesroom, No. 111 Broadway, New York City.

This property is about 2¼ miles west of WEST SALISBURY STATION on the SALISBURY BRANCH, BALTIMORE AND OHIO R. R., which is a good shipping point; the Railroad having surveyed for an extension of their road to within ⅛ mile of these lands, makes it easy of access. The Mutual Telegraph Co. run over the lands around the public roads.

THESE LANDS are underlaid with BITUMINOUS COAL, FIRECLAY, IRON ORE and LIMESTONE, and have a fair average of the several kinds of Timber grown in this section, viz.: WHITE OAK, RED OAK, HEMLOCK, ROCK OAK, ASH, POPLAR, CHERRY, BLACK BIRCH, CHESTNUT, etc.

After the timber is cleared off, will make good farming and grazing lands, being well supplied with running streams.

THE ATTENTION OF COAL COS., IRON AND COAL MINERS, AND RAILROAD COS., ALSO CAPITALISTS, IS CALLED TO THE SALE OF THIS PROPERTY.

50 PER CENT. may remain on **BOND AND MORTGAGE** at 5 per cent. interest for One Year or all cash if desired. **Reports of E. V. D'Anvilliers, Geologist** and **Mining Engineer**, of **Philadelphia**, and other particulars can be had at the **Auctioneers'** office, **24 Pine Street, N. Y. City.**

For Sale.
Second-hand Open Side Extension Planer.

Intending to put a large planer in its place, we will sell our 48 in. high x 20 ft. long Open Side Extension Planer now running in works for $2500 f.o.b. Baltimore. It has four heads, two on the cross rail and one on each post. In good order; can be seen any day at our works.

CHEMIST; one having had some experience in car wheel work; state age, experience and salary expected. Address "Car Wheels," care *The Iron Age*, New York.

By large machine works in Germany, a thoroughly competent DESIGNER of large lathes, planers and large boring mills; applicants must be well acquainted with best American practice and must also be posted on the operation of these machines; knowledge of German not essential; give full particulars as to experience, age and salary expected. Address "Lathe Designer," care *The Iron Age*, New York.

Situations Wanted

Undisplayed Advertisements for Situations Wanted not exceeding twenty-five words Fifty cents each insertion. Additional words two cents each.

MANAGER.—A gentleman with extensive experience in building and managing steel works and rolling mills, and in selling their product, wishes to associate himself with a large company in the capacity of local sales agent in some good territory; is a graduate engineer, member of principal engineering societies and has a large business acquaintance; at present holds a good position, but is looking about for something better; best of references; correspondence confidential. Address "J. P. A.," care *The Iron Age*, New York.

A metallurgical engineer of 20 years' experience in building and operating steel works, rolling mills, &c., graduate of technical school, wants a position as CHIEF ENGINEER, SUPERINTENDENT or ASSISTANT with some large, up to date concern; well acquainted with modern design and practice in this country and abroad, and can furnish best of references; now holding excellent position, but wishes to make a change for good reasons. Address in confidence "S. R. B.," care *The Iron Age*, New York.

Civil engineer, graduate of leading school, with 20 years' experience as ENGINEER and SUPERINTENDENT with several large companies, familiar with designing, estimating and execution of work, desires a responsible position; has occupied position with present employer for past ten years, but wishes to make a change which will be in the direction of advancement. For reference and further information address "M. T. S.," care *The Iron Age*, New York.

PURCHASING AGENT of a large machinery manufacturing corporation wishes to connect himself with some good concern in a similar capacity or as a resident buyer for some out of town firms; he has had a wide and valuable experience in buying, and the management of the corporation with which he is now connected will cheerfully testify to his excellent reputation for integrity and close buying. Address "Purchasing Agent," care *The Iron Age*, New York.

A position as SALESMAN by an experienced hardware and supply man; am well acquainted with the hardware trade of Indiana; salary or commission. Address "J. C. J.," care *The Iron Age*, New York.

Advertiser, possessing considerable experience and connection with the British and Colonial iron and hardware trade, is returning to England and will be glad to enter into communication with manufacturers and exporters desirous to cultivate such business. Answer "No. 25," care *The Iron Age*, Pittsburgh, Pa.

To correspond with manufacturers of hardware, supplies, machinery, &c., who are not represented in Indiana in regard to handling their goods on commission. Address J. C. Jamieson, manufacturers' agent, Room 3, Shirk Building, Peru, Ind.

Young man, practical, experienced on repairs of building iron working machinery, pipe fitting, jib square shaft or electric traveling cranes, or to erect machinery of almost any kind; best of references. Address "M.," care *The Iron Age*, 117-119 South Fourth street, Philadelphia, Pa.

Erecting machinery, boilers or structural iron work; salary or contract; best references. Address "Williams," 347 East Forty-fourth street, New York.

BUSINESS, SALES or ADVERTISING MANAGER by one who has had 16 years' business experience; have filled every position from office boy to proprietor; thorough knowledge of bookkeeping, general business methods and sales or advertising department organization; have served both advertiser and publisher; experience as salesman and in handling salesmen; I know how to get maximum results. Address "Permanent," care *The Iron Age*, New York.

MECHANICAL ENGINEER, CONSTRUCTOR, DRAFTSMAN, MASTER MECHANIC, CALCULATOR; used to solving mechanical problems; expert organizer of rapid production; moderate terms; references. Address 135 Nevins street, Brooklyn, N. Y.

As ROLL TURNER; turn all kinds of plain and shape work; experience; steady and reliable; best of reference; wages moderate. Address "Turner," care *The Iron Age*, New York.

As SUPERINTENDENT of a malleable iron works; have had a large practical experience. Address "F. L. B.," care *The Iron Age*, New York.

MODELER; first-class man for small work especially; good reference; position in city or country desired. Address "Modeler," care *The Iron Age*, New York.

BRASS AND COPPER.

An experienced salesman wants to make a change. Will sell on either salary or commission, or will assume entire charge of the erection and operation of a small rolling mill for parties wishing to engage in manufacturing.

"CAPABLE 330,"
care *The Iron Age*, New York.

SCIENTIFIC BLAST FURNACE MANAGER of 12 years' experience, North or South, who can give some of the leading iron men in the country as references, is open for an engagement. Address "Blast Furnace, No. 323," care *The Iron Age*, New York.

OPEN HEARTH MELTER; strictly temperate; best of references. Address "O. H. Melter," care *The Iron Age*, Hamilton Building, Pittsburgh, Pa.

WANTED

As FACTORY SUPERINTENDENT by man 35 years of age; practical tool maker; have had ten years' experience as superintendent of manufacturing concerns; capable of putting a plant on paying basis; at present employed by one of the leading concerns in their line; can furnish best of references for the past ten years; none but first-class companies need apply. Address "I. S., 323," care *The Iron Age*, New York.

As SUPERINTENDENT of foundry and machine company by a thoroughly practical man; is competent to make estimates on castings or take charge of office, and travel if necessary. Address "B. E. A.," care *The Iron Age*, New York.

A young man of good habits and ability as ROLL TURNER; any firm who wish a man that they can depend on, will please address "S. S. W.," care *The Iron Age*, New York.

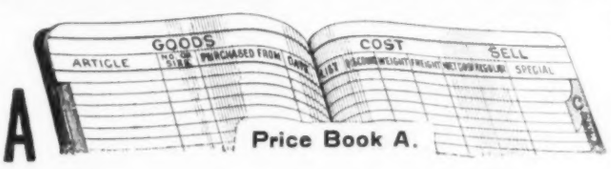
By a practical expert as SUPERINTENDENT or FOREMAN of sewing machine, typewriter, bicycle or such manufacturing concern; experienced in charge of men; am a practical mechanic and capable of designing tools, jigs and labor saving devices. "Expert," care *The Iron Age*, New York.

Young man, number years' experience in machine shops, &c., desires situation; good manager of help. Address "M. W. C.," P. O. Box 1429, Boston, Mass.

THE IRON AGE
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

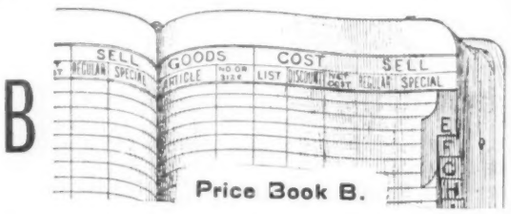
These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.



Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

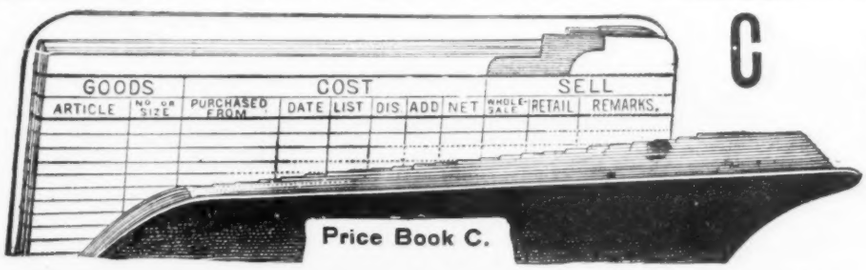
A, 200 pages,	$1.00	**A 2,** 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2,** 400 pages with flap,	1.75



In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages,	$1.00	**B 2,** 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2,** 400 pages with flap,	1.75



The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***

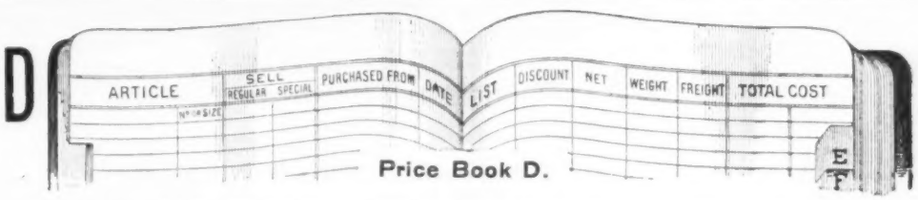
FOUR EDITIONS:

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50

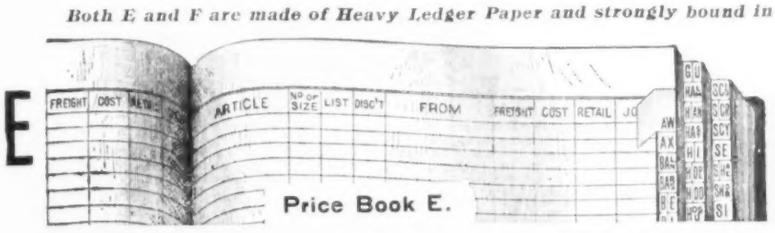


MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to	AU	For Chisels,	turn to	CH$^{I}_{U}$	For Iron,	turn to	IRO
" Parers, Apple	"	PA$^{P}_{R}$	" Cutlery,	"	CUT	" Irons,	"	IR'S

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.



AD	GU	SC$^{I}_{O}$	
AN	HA$^{L}_{M}$	SCR	
AU	HAN	SCY	
AW	HA$^{S}_{T}$	SE	
AX	HI	SH$^{A}_{E}$

Paris Exhibition

INTENDING EXHIBITORS, who have not yet completed their arrangements for representation, are invited to correspond with us. We are prepared to take charge of exhibits from factory to exhibition grounds, and return, attending to all the work entailed. Our Paris Branch has moved into new spacious quarters at No. 76 Rue de Turenne, and is equipped with a numerous staff of well-trained commercially and mechanically skilled assistants, who speak the language of the country. We are particularly well situated to do work of a nature apt to produce the best practical and profitable results. We are prepared to finance and guarantee approved transactions, that may offer themselves in connection with the Exposition.

Perhaps

you now have in mind a new Circular, Price List or Catalogue on some mechanical subject? Why not this time, in place of simply bundling up your "matter" and sending it off to your printer with the usual sigh of relief, write me for samples of the way I handle such things?

Perhaps seeing such "Samples" might profit both of us? but if you thought otherwise you could then drop back into the old rut.

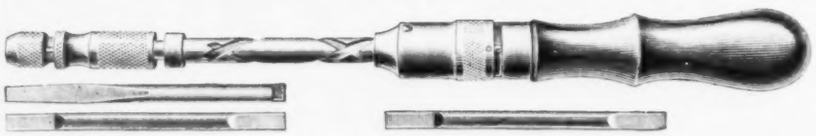
MILLERS FALLS

In and Out Screw Driver, No. 41.



This cut represents our latest and best Reversible Screw Driver. In producing it we have attempted to correct the faults of similar tools already upon the market. One of the objections to those heretofore made, with grooves crossing each other, has come from wear at the points of intersection. In our No. 41 there is really no such point; one of the grooves being deeper cut than the other, preserves the entire individuality of each. It is simple in construction and simple to operate, the mere turning of the shell near the handle shifting the movement from right to left or vice versa. By turning the shell half way it locks the spiral so that it can be used as an ordinary driver, and at different lengths. By using a mechanical device we have tested this tool against a resistance equal to driving a 1½ screw. After giving it one hundred thousand movements or plunges we are unable to detect any wear.

With each tool we put up three bits, two of them double end, giving five points in all.

Price per dozen, $18.00.

MILLERS FALLS, MASS. NEW YORK.

Simplex Time Recorder

So named because it is simple in construction, in operation, and in reading the record.

A Great Time Saver

Cultivates promptness and saves disputes. Registers by the push of a button. Nothing more. One hundred men can register in one minute on one recorder. Adapted to large or small concerns. No keys, checks, cards, tape or ink ribbon. For SIMPLICITY, COMPACTNESS, DURABILITY and QUICK REGISTRATION, absolutely without a rival.

Full description for the asking.

IMPORTANT DECISION RELATING TO THE

HEINISCH

TRADE-NAME ON SHEARS, TRIMMERS, &C.

The U. S. Circuit Court, Southern District of New York, Judge Townsend, has rendered a decision in the suit of "R. Heinisch's Sons Co. vs. Hermann Boker & Co."

"The Complainant is entitled to an accounting, and to an injunction restraining them from using the names 'Heinisch' or 'H. C. Heinisch' on its Shears, Labels, etc., and otherwise, in any way which will interfere with Complainant's enjoyment of the benefits of its Trade-name."

Referring to the above decision we would respectfully state our determination to protect our rights in the premises and warn all persons against any imitation of our Trade-name.

PEARCE'S IMPROVED CAHOON PATENT BROADCAST SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The CAHOON is not the lowest price seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two-thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the CAHOON make a profit and a satisfied customer at the same time. They stay sold. A prominent hardware dealer in the South wrote us under date of Feb. 13, '99, "We are not handling any other broadcast seeder similar to yours. Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principal distributing points.

GOODELL COMPANY,

ANTRIM, N. H.

The '98 Chicago Clipper Retails For $8.75.

HARDWAREMEN—DO NOT ORDER

another old-fashioned, out of date two-hand horse clipper. Be enterprising and order the '98 CHICAGO CLIPPER. The greatest clipping machine ever invented; holds the world's record for fast clipping; time 14 minutes. You can sell one of these machines to every man who used to buy the old fashioned two-hand variety. Ask your jobber about them or send to us direct.

HAIR CLIPPERS.

If you want a clipper "with a reputation" insist on the "Stewart Patent." There is no other "just as good" and they will cost you no more than the inferior kind.

We have just been awarded Gold Medal at Trans-Mississippi Exposition, highest and only award for horse clipping, sheep shearing and cattle grooming machines.

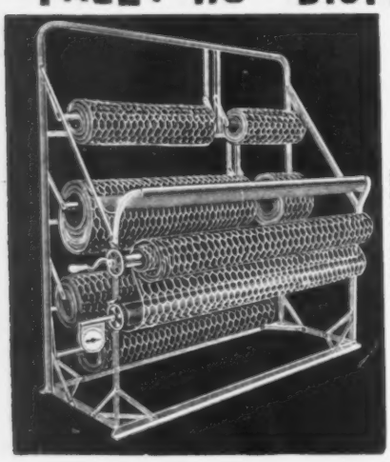
THE BRIDGEPORT CHAIN COMPANY, Bridgeport, Connecticut, U. S. A.

"TALLY-HO" DISPLAY RACK AND MEASURING MACHINE



PATENT ALLOWED.

Arranged for conveniently measuring, winding and handling POULTRY NETTING

The MEASURING AND HANDLING OF POULTRY NETTING has been a most trying and vexatious problem. The "TALLY-HO" has solved the long vexing question of how to measure the stubborn stuff. It is needless to enter into the details of all the disagreeable annoyances attending the retailing of an article that is growing in demand each year. You know what they are, and a description of the machine will show you that they are all overcome and that the selling of any number of feet, of any width, can be done in a few minutes by one person with pleasure instead of trial and trouble.

The machine is made of GALVANIZED IRON, occupies only 28 INCHES by 80 INCHES floor space and is 70 INCHES HIGH, and holds one bale each 12, 24, 36, 48, 60 and 72 inch netting.

ITS CONSTRUCTION is on STRICT MECHANICAL PRINCIPLES, and with ordinary usage it WILL LAST A LIFE TIME.

It winds the netting compactly while measuring, and the rolls are easily tied and ready for delivery.

It provides a place where netting is always in view, and makes a display of what under the old way is a ragged looking lot of cut pieces always in the way.

It saves much waste in taking care of small pieces. It saves time and the annoyance of carrying the bales out to the street to cut and measure.

IT IS GUARANTEED to do the work claimed for it and embodies every need for rapid and easy handling of poultry netting.

These are facts that will merit and command your attention.

McIntyre's

Dry Battery Portable Electric Safety Lamp...

This is an Electric Lamp set in a White Enamel Parabolic Reflector, and can be attached to the cap or any part of the clothing by means of a stick-pin attached to reflector and connected to the battery with a flexible cord. The battery is arranged to be carried on a belt or in the pocket. So the user has free use of hands. The current can be turned off when not in use. Dry batteries are used and can be recharged from direct Incandescent Electric Current Charger and full directions go with each Lamp.

IS USED BY THE FOLLOWING: For Watchmen, Miners, Mine and Gas Inspectors, Boiler Shops, Oil and Gas Works and Gas Fitters, City Sewer and Underground Cable Inspectors; Powder Mills and Warehouses where explosive materials are manufactured and stored; exploring cellars and trenches where leaks occur, and investigating pipe connections where it is impossible to carry an oil lamp or candle for fear of explosion—and all parties requiring a safe portable light. The whole outfit is neat and compact.

No. 1 weighs 2 lbs., 1½ C. P. Price complete, $4.00. For Meter Reading Only.

No. 2 weighs 3 lbs., 4 C. P. Price complete, $6.00. For General Use.

No. 3 weighs 12 lbs., 10 C. P. Price complete, $12.00. For Several Persons to Work By.

INFRINGEMENT NOTICE.

It appears that a certain manufacturer is now proposing to furnish ***HAY KNIVES*** to the trade and to use the word ***"LIGHTNING"*** in connection therewith, say on labels, boxes, etc., etc. We desire to give this timely notice to all interested that said word ***"LIGHTNING,"*** as applied to Hay Knives, is our lawful Trade Mark, duly registered, and is No. 9583 in the U. S. Patent Office; that its validity has been affirmed in the strongest manner by a U. S. Circuit Court, and in these words: "The Trade Mark '***LIGHTNING,***' as applied to ***HAY KNIVES,*** is valid both at ***COMMON LAW*** and by the Act of Congress of March 3, 1881." We shall guard our property to the utmost of our ability and infringers thereof, either manufacturers or dealers, will kindly give this matter careful consideration. By fair dealing and strict adherence to the principle of manufacturing A1 high grade goods only, it comes to pass in these days that our Trade Mark is of especial value to us and we shall protect it accordingly. We shall esteem it a favor if the trade, wholesale or retail, will kindly report to us, or to our agents, Messrs. Wiebusch & Hilger, Limited, 9-15 Murray St., N. Y., any information bearing on this matter which may come to their notice, thereby aiding us in disposing of an unprincipled competition.

CLARK & PARSONS COMPANY.

EAST WILTON, ME., March 27, 1899.

CARPENTRY AND BUILDING

Series No. 2.

Modern American Dwellings

With Constructive Details.

The Most Elaborate and Complete Volume of Plans Ever Brought Out for the Use of Architects, Builders and Home Seekers.

BY NUMEROUS ARCHITECTS.

A selection of thirty-seven designs of artistic suburban dwellings erected in various sections of the country, at a cost ranging from $2,000 to $5,000, and embracing floor plans, elevations and constructive details showing interior and exterior finish, all drawn to a convenient scale, together with brief extracts from the specifications.

Those who contemplate building a home will find this volume of great value. In connection with each design is given the necessary floor plans, elevations and constructive details as will enable any practical builder to execute the work. The plans are diversified in both the interior arrangement and external appearance, and will afford to persons of various requirements an opportunity to select a home suited to their taste and convenience.

33 Half-Tone Engravings. 127 Full Page Plates of Elevations, Floor Plans and Constructive Details. 40 Pages of Descriptive Text. Size 9 x 13 in. (oblong), Handsomely bound in cloth. PRICE $2.00.

Practical Drawings for the Erection of Low Cost Houses.

Cottage Designs with Constructive Details

BY VARIOUS ARCHITECTS.

A PRACTICAL BOOK FOR BUILDERS AND THOSE INTENDING TO BUILD.

A series of twenty-five designs of cottages, most of which have already been erected, ranging in cost from $600 to $1,500, together with constructive details of interior and exterior finish, all drawn to convenient scale and accompanied by brief specifications.

PRICE, $1.00.

One of the many features of *Carpentry and Building* is the publication in each issue of one or more practical designs of attractive houses with accompanying floor plans, details, &c. A selection of these designs is now presented in convenient book form.

These plans are especially complete and available for the requirements of builders and carpenters, for not only are floor plans and elevations given, but also the ***details of construction,*** showing how the work is done as well as the style of interior trim and exterior finish, all ***drawn to convenient scale.***

The practical value of the designs is further enhanced by the addition of brief ***specifications.***

Practical builders and those who wish to act as their own architects will find in this valuable book many complete details of construction for a variety of attractive, well arranged, and inexpensive cottages or suburban residences.

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material through out.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

GLIDDEN'S METALLIC REPAIR OUTFIT

The one that has the Hinged Plugs.

THIS is the smallest, neatest, most compact and practical repair outfit ever offered to the public. Complete in a tin box 1½ inches long, 1 inch wide and ¼ inch thick. It will repair a puncture at once, without the use of cement, and any woman or child can use it. The plug is made of metal with a **hinged head, which can be forced into a much smaller opening than one with a stationary head.** Two sizes of plugs are furnished with each kit, which will fit ordinary punctures; also a cutter is furnished, to be used when the puncture is too small to admit the plug.

Directions for use. Place the flat plate of the plug so it will be loose on the key. Screw the key into the plug and insert into the hole, leaving the flat plate on the outside of tire. Draw back the key so that the plug will rest flat on the inside of the tire. Screw the flat plate to plug with wrench (left hand thread), and turn key to right. Remove the key by turning to left, and you have a permanent repair which does not injure the tire or its looks.

DISCOUNT TO THE TRADE, ASK YOUR JOBBER FOR IT.

JUST PUBLISHED.

A Manual of Practical Methods of Repairing Bicycles.

By S. D. V. Burr.

Fourth Edition, Revised and Enlarged.

Cloth Bound. 208 Pages. 205 Illustrations.

THE BICYCLE is treated as a machine composed of many parts, each of which may be damaged to a greater or less extent. Each injury to each part is discussed fully, and the best methods of making the necessary repairs are explained thoroughly. The treatment of assembled parts, in such operations as brazing, nickel plating, enameling and the like, is described in detail.

Almost every topic is illustrated with one or more original engravings.

The book deals with the simplest and most useful appliances for repairing. It is in every way practical. It is recommended not only to manufacturers of bicycles, but more particularly to all those who handle bicycles, whether as dealers or repairers.

Price, Post-paid, One Dollar.

"Small Talk About Business."

By A. E. RICE.

A Banker's Business Hints for Men and Women.

A bright man, with his wits about him, is often described as "All Business." Being "all business" is knowing how to do the right thing the right way.

Do you want to be "all business?" The book tells. The wrong way wastes money and wastes time. Where is the good of that? The book tells nearly every thing that an enterprising business man ought to know. Everything in it is worth knowing.

The book is called "Small Talk About Business." It is full of money-saving talk for old and young, for men and women, for business-like and unbusiness-like people. YOU ought to have it.

Price, 50 cents. 120 Pages. Elegant Cloth Binding.

Domestic Electrical Work.

Concise and Practical Explanations for Plumbers, Tinners and Hardware Dealers on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting from Batteries.

Illustrated with Twenty-two Diagrams.

By WILLIAM A. WITTBECKER.

Price in Paper, 25 Cents.
Price in Cloth, 50 Cents.

The growing demand for simple electrical apparatus in dwelling houses, offices and workshops, and the need of plain instructions whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, neither is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings this little volume is addressed. The information given is above all else practical, and with a close observance of the directions laid down any one without the slightest knowledge of electricity should be able to do the work described.

CONTENTS.

Chapter I.—Simple Bell Circuit.
Chapter II.—Multiple Bell Circuit.
Chapter III.—Various Circuits.
Chapter IV.—Fire Alarms.
Chapter V.—Annunciators and Alarms
Chapter VI.—Burglar Alarms.
Chapter VII.—Automatic Fire Alarms.
Chapter VIII.—Electric Gas Lighting.
Chapter IX.—Running Wires in Finished Buildings.

COVERT CARRIAGE and WAGON JACKS.

No. 475.

THE COVERT STEEL CARRIAGE JACK weighs six pounds and will lift 1,000 pounds.

The step is **leather covered,** thus effectually preventing the metal coming in contact with the axle and marring the paint. The step can be readily adjusted to the height of any axle. It has a direct perpendicular lift, without any horizontal or oscillating movement so objectionable in other Jacks.

COVERT STEEL WAGON JACK is made for heavy work; weighs ten pounds and will lift 2,000 pounds.

For Sale by Jobbers at Manufacturers' Prices.

COVERT MFG CO., West Troy, N. Y.

IVER JOHNSON CYCLES.

$40 | $50 | $60 | $75 | —

A COMPLETE LINE.

Our line of cycles this season is very complete and Iver Johnson agents will be in position to cater for all the trade. Models of 30 in. wheels as well as chainless patterns are included, and all have the high class construction for which our cycles are noted.

Drop Forged Connections

are used throughout. This form of construction is admitted to be best, but very few wheels are built this way on account of the expense.

Send for free art catalogue containing much interesting information.

GOOD AGENTS WANTED.

LADD'S DISCOUNT BOOK.

For Example, we desire to find the net of $73.00 at discount 65, 20, 7½, 5 and 2½ per cent. By the old way we take our pencil, and, after a deal of figuring, conclude (if we haven't made an error) that the result should be $17.51, but we are not sure of it till we prove it. By the new way (the use of Ladd's Discount Book), we put our finger right on it in a moment, and know that the result is correct.

The book contains over 100,000 computations, and is indispensable where percentages are employed. Price, per mail, $3.00. Double Indexed Edition, $4.00.

For Sale by DAVID WILLIAMS CO., Publishers and Booksellers, 232 William St., New York.
